Subject: Map refinement and code reconciliation project

I have lived in Willamette Heights for forty years and remember the rejection of a previous effort to allow uphill "creep" of the industrial zoning to encroach on a fine, historic area of family homes.

Please do not authorize this change in zoning designation which was thoughtfully rejected the last time it was proposed in a slightly different form.

The vegetative hillside buffer holding the steep landfill in place should not be encroached.

This was clearly explained by my neighbors at the public hearing and I fully endorse their position..
