

CITY OF
PORTLAND, OREGON

**OFFICIAL
MINUTES**

A REGULAR MEETING OF THE COUNCIL OF THE CITY OF PORTLAND, OREGON WAS HELD THIS 26th DAY OF APRIL, 2000 AT 9:30 A.M.

THOSE PRESENT WERE: Mayor Katz, Presiding; Commissioners Francesconi, Hales, Saltzman and Sten, 5.

OFFICERS IN ATTENDANCE: Karla Moore-Love, Acting Clerk of the Council; Ben Walters, Deputy City Attorney; and Officer Chuck Bolliger, Sergeant at Arms.

Agenda No. 555 was pulled from Consent. On a Y-5 roll call, the balance of the Consent Agenda was adopted as follows:

CONSENT AGENDA - NO DISCUSSION

- 551** Cash investment balances March 2 through March 29, 2000 (Report; Treasurer)

Disposition: Placed on File.

- 552** Accept bid of Portland Freightliner to furnish 33,000 GVW cab and chassis for \$87,499 (Purchasing Report - Bid No. 99837)

Disposition: Accepted Prepare Contract.

- 553** Accept bid of Geo-Tech Explorations, Inc./Stettler Supply Company to furnish water supply production wells 35, 36 and 37 for \$1,237,523 (Purchasing Report - Bid No. 99856)

Disposition: Accepted Prepare Contract.

- 554** Reject all bids for Multnomah Arts Center re-roof project (Purchasing Report - Bid No. 99869)

Disposition: Accepted.

Mayor Vera Katz

- 556** Approve the updated Arena Finance Management Plan for FY 1998-99 and the July 1, 1999 through June 30, 2004 Plan (Resolution)

Disposition: Resolution No. 35881. (Y-5)

- *557 Extend legal services agreement with Hoffman, Hart & Wagner LLP (Ordinance; amend Agreement No. 32205)

Disposition: Ordinance No 174368. (Y-5)

- *558 Amend agreement between Multnomah County District Attorney's Office and the City for use of Local Law Enforcement block grant funds (Ordinance; amend Agreement No. 50930)

Disposition: Ordinance No. 174369. (Y-5)

- *559 Pay claim of Kenrick R. Luck (Ordinance)

Disposition: Ordinance No. 174370. (Y-5)

Commissioner Jim Francesconi

- 560 Accept contract with Clermont Enterprises, Inc. for hauling services at Mt. Scott Aquatic Center as substantially complete and authorize final payment (Report; Contract No. 32175)

Disposition: Accepted.

- *561 Grant Specially Attended Transportation permit to Viraphanh Vorachanh, doing business as Med-Way (Ordinance)

Disposition: Ordinance No. 174371. (Y-5)

- *562 Authorize application to Oregon Parks and Recreation for a grant in the amount of \$25,000 to complete the staircase from the NW Thurman Street overpass into lower Macleay Park (Ordinance)

Disposition: Ordinance No. 174372. (Y-5)

- *563 Authorize agreement for acquisition of the Dodge property adjacent to the Springwater Corridor at 8644 SE Lambert Street (Ordinance)

Disposition: Ordinance No. 174373. (Y-5)

Commissioner Charlie Hales

- 564 Accept contract with EIR Electric for street improvements on NE Martin Luther King Jr. Blvd., NE Portland Blvd. to NE Dekum Street, as complete, release retainage and make final payment (Report; Contract No. 32315)

Disposition: Accepted.

- *565 Authorize a contract and provide for payment for the SE Tacoma Street, McLoughlin to 32nd, street improvement (Ordinance)

Disposition: Ordinance No. 174374. (Y-5)

APRIL 26, 2000

Commissioner Dan Saltzman

- 566** Accept completion of the Whitaker Slough culvert replacement, NE 92nd Dr. and Marx sanitary sewer, Project No. 5804/5629, and authorize final payment to John L. Jersey & Son, Inc. (Report; Contract No. 32494)

Disposition: Accepted.

- 567** Accept completion of the Columbia Boulevard Wastewater Treatment Plant odor control project, sewer cleanings unloading area, Project No. 6551, and authorize final payment to Triad Mechanical, Inc. (Report; Contract No. 32562)

Disposition: Accepted.

- *568** Amend agreement with PricewaterhouseCoopers LLP for Bureau of Environmental Services audit findings (Ordinance; amend Contract No. 32215)

Disposition: Ordinance No. 174375. (Y-5)

- 569** Authorize application to the US Environmental Protection Agency for a grant in the amount of \$399,503 for the Environmental Monitoring for Public Access and Community Tracking program (Ordinance)

Disposition: Passed to Second Reading May 3, 2000 at 9:30 a.m.

Gary Blackmer

- *570** Assess system development charge contracts and private plumbing loan program contracts (Ordinance; Z0723, Z0724, T0038, T0039, K0021, K0022, P0051)

Disposition: Ordinance No. 174376. (Y-5)

REGULAR AGENDA

- 555** Accept bid of Ausbie & Associates, Inc. to furnish NE 162nd Ave pollution reduction facility fencing for \$63,187 (Previous Agenda 521; Bid No. 99853)

Discussion: Sue Klobertanz, Director of Purchasing said they are recommending the contract be awarded to Ausbie & Associates, Inc. Mr. Ausbie is requesting he be provided financial assistance to obtain the fencing material, which is approximately \$50,000 of the \$63,187. The manufacture wants thirty percent down and the balance on delivery. They are not legally obligated to provide the financing on this. One option available provided eighty-five percent of the material cost upon delivery to the site.

Mayor Katz asked if all other possibilities had been pursued.

Ms. Klobertanz stated they had long lengthy discussions with Mr. Ausbie and within the City staff and believed they made him aware of all the possibilities that he might be able to avail himself of.

APRIL 26, 2000

Commissioner Saltzman asked if purchasing would recommend awarding with the eighty-five percent payment on delivery.

Ms. Klobertanz said that is at the discretion of what is in the standard provision in the standard construction specs that the engineer can make following the award of the contract.

Commissioner Francesconi asked if we would have to go through any processing again if Mr. Ausbie decided not to go through with it or could we give it right away to the next bidder.

Ms. Klobertanz said it would go to the next bidder.

Mr. Ausbie stated he was trying to lay out something beneficial for all concerned and to establish some type of precedent for general contractors. The program is suppose to help them to grow and in doing so all contractors need to establish letters of credit. The contractor is out of state and will not accept anything else. This will give them thirty days to pay for the materials.

Commissioner Saltzman asked if it was the supplier that will take the letter of credit and nothing else.

Mr. Ausbie affirmed.

Commissioner Sten asked even though we will pay as soon as you get the materials the supplier will not accept that.

Mr. Ausbie said it was FOB destination which means as soon as it has landed here they have to receive payment.

Commissioner Sten asked if they are saying you will get 85 percent as soon as it lands here.

Mr. Ausbie confirmed. Out of state contractors have to have full payment once the material lands. They will accept thirty percent up front and then the balance upon delivery. Locally you do not have that problem as they will bill you net in thirty days.

Commissioner Francesconi asked how much money it was and what amount was short for thirty days.

Mr. Ausbie said the total was \$50,000 for all materials. There is not a lot of profit in this and a lending institution would cut into the profits. He has to make this project viable for all concerned, or it would be done for nothing.

Commissioner Francesconi asked if the amount needed was \$50,000 for thirty days.

Mr. Ausbie confirmed stating they do not actually need the money they just need the letter of credit then they will bill thirty days.

Mayor Katz asked Sue Klobertanz if she was going to try and problem solve this further.

APRIL 26, 2000

Ms. Klobertanz said she thought she had tried to do that and laid out all the options including suggesting Mr. Ausbie approach Portland Development Commission for a loan. Mr. Ausbie said the profit margin on this size contract is fairly small and he is not willing to take out a loan.

Commissioner Saltzman asked what council decision was on a letter of credit.

Ms. Klobertanz said as part of the proposal for the fair contracting employment strategy there was a portion that had been drafted that included a request for funding for financial assistance. Because of restrictions in funding, Council decided not to include funding for any short term financial assistance.

Mayor Katz asked if the group would revisit this issue even though the Council made a decision several years ago.

Ms. Klobertanz stated it has been a constant recurring theme from all parties involved and that short term financing is an issue for small business and they believe it is not available to them in the open market.

Mayor Katz asked even with the Portland Development Commission loan program.

Ms. Klobertanz said yes, because they feel that the Portland Development Commission loan programs do not meet their immediate needs. It is more of a loan program than a letter of credit.

Mayor Katz said to put it back on the agenda to see what could be recommended down the road.

Commissioner Francesconi supports it, as legally they do not have any other choices.

Mayor Katz said in relation to Blueprint 2000 it is a good idea to continue some of the work that was started.

Disposition: Accepted Prepare Contract. (Y-5)

549 TIME CERTAIN: 9:30 AM – Stormwater Advisory Committee status report and proposed Stormwater Manual revisions (Report introduced by Commissioner Saltzman)

Discussion: Commissioner Saltzman said the Stormwater Manual was passed a year ago. Issues were identified for further input and review and Stormwater Advisory Committee was called for.

Dean Marriott, Director of Bureau of Environmental Services, said the Stormwater Advisory Committee was asked to define and monitor benchmarks for progress to determine how well the manual was working, to review and make recommendations for improvements to the manual and report periodically to this Council.

Commissioner Francesconi asked what was the role of the Council regarding changes being made to the manual.

APRIL 26, 2000

Mr. Marriott said he is the one who adopts the manual but modifications to Code may be necessary. This is a progress report, not the final report from the committee.

Bob Grumal, Stormwater Advisory Committee, said they discussed appropriate pollution reduction standards, formal systems for signing credits for facilities built over capacity, maintenance responsibilities, standards and credits for on site facilities that receive runoff from public right-of-way, review of management practices, definitions of redevelopment, design of flow rate formulas and recommended bench marks. Their primary intent was to simplify use of the manual and make it easy for the development community and City staff to use and reduce the impact of the quality of the water that flows into our rivers and streams.

Jerry Retzer, Stormwater Advisory Committee, said he was the neighborhood and watershed representative on the committee. Two benchmarks are is the manual doing what it was intended to achieve and how good is the policy. The three technical benchmarks are: 1) the manual will continue to meet or exceed a pollution reduction standard at the time the permit is issued; 2) will the manual result in a variety of facilities for stormwater management; and 3) is the manual an accepted measure based on user surveys and complaints. Two policy benchmarks are that the manual result in stormwater discharges that support the City's water quality goals and result in rate and volume post-development to supporting City goals. Are we moving in the right direction, are we improving water quality as a result of the discharges from new sites and facilities and are we maintaining and/or reducing rate and volume of runoff from these sites. The manual should use the same standard of 70 percent total suspended solid removal for new and redevelopment. That standard should be kept as a placeholder for the current time. Compliance with the manual should be evaluated based upon whether the developer or property owner implemented the design in accordance with the manual. A new owner outreach program is recommended.

Eric Strecker, Stormwater Advisory Committee, representing the Tryon Creek Watershed Council, said they have looked at addressing the impact of existing development on stormwater. There is new data from studies about how effective the facilities allowed in the manual are on different pollutants and what other environmental consequences they may have. He recommended standards and credits for facilities that receive runoff from the public right-of-way; develop policy benchmarks and affluent based pollutant reduction standards; and look at the requirement that developments treat the runoff from impervious areas only.

Commissioner Hales asked what constitutes redevelopment in regards to stormwater.

Mr. Grumal said the current manual would not require any stormwater improvements for that project.

Commissioner Hales asked if it was being recommended that they should.

Mr. Grumal stated in the future they are recommending a percent value of the project and an additional system development charge that goes to creating a public facility or improving stormwater on that particular project.

Commissioner Hales asked what would they do to the building.

APRIL 26, 2000

Mr. Grumal said that a project downtown would provide a stormwater facility on the outside in the public right-of-way, mechanical system underground and a tank to treat the stormwater.

Commissioner Hales asked how the stormwater would be treated and what pollutants need to be removed from that water.

Mr. Retzer said the question asked is looking forward. The example given does not require any stormwater management or pollution reduction under the current rules. Outside changes will require stormwater management.

Commissioner Hales asked if the recommendation is to start making buildings treat the water coming off the roof and what is in the water.

Mr. Strecker said their recommendation is to look at the issue. Studies show that in fifty percent of some cases heavy metals are falling out of the sky with the rain. Dryfall deposition goes on during dry periods. This is still not as bad as the runoff from the street.

Commissioner Hales asked if the solution would be to install a tank, but not in the building.

Mr. Grumal said one opportunity is to put an underground facility in the street that treats the runoff from the building and water running by in the street.

Commissioner Hales asked how will that work with a building two hundred feet up and what will they do with the stormwater from the roof.

Mr. Grumal noted the manual requires they treat the stormwater from the roof. They need to build a tank with the option to put it in the sidewalk as a public facility or put it inside the building. Putting it in the street and treating some of the street runoff so it would be a combined system to be turned over to the state.

Commissioner Hales asked if he meant the transit mall.

Mr. Grumal said yes.

Commissioner Hales asked if anyone has checked with the utilities and Portland Department of Transportation to see how big the tanks are and if there is room for them.

Eric Strecker said every project is going to have to be different. You could choose to store runoff on the roof and deal with it up there with things such as roof top gardens.

Commissioner Hales again asked how big are the tanks.

Mr. Grumal stated they are five foot diameter tanks and ten feet deep.

Commissioner Hales asked if they will treat a half block building.

Mr. Grumal said a facility can treat five or six city blocks.

APRIL 26, 2000

Commissioner Hales said we can not require a building owner to build something to serve a variety of properties in the public right-of-way.

Commissioner Saltzman asked if we could accommodate public right-of-way runoff, as The Hilton did when they chose to pursue the underground tank option.

Commissioner Hales noted there is a prescriptive path that says if you are building a downtown building that you get to put a tank in your basement that is a certain size and a check that you have met the standards. He asked if we are able to do that today.

Mr. Grumal said yes.

Lana Danaher, Bureau of Environmental Services staff, stated that starting May 1st changes will be drafted and policies will be managed as closely as practicable to the site of development and managed in a manner that avoids negative quality and quantity impacts on streams, wetlands, ground water and other water bodies. The manual applies to all development private, public and includes linear projects. Starting with water quality, 70 percent TSS removal was the pollution standard. They would take a menu approach to provide developers with choices that were equally weighted. Surface infiltration approaches will be emphasized and by using vegetative approaches the impervious area can actually be reduced. They will be working with stormwater rate reform to develop incentives with emphasis on mitigation measures. Where site conditions allow, vegetative approaches will be taken up to see what will mitigate impervious areas before selections from the menu have been made. It is not known who will determine the feasibility of this. Feedback from users indicates it has been confusing to use. The area of the manual that deals with source control is having a major rewrite as users have concerns with it. They will be coming back in June with more specificity, possible code revisions, especially with redevelopment. Continuing watershed and facility planning to identify where offsite facilities are necessary, or not possible and to deal with specific TMDL's. Changes will be implemented July 1st to coordinate with the rate reform incentive program. The stormwater advisory committee will be working on existing development.

Gail Day, Realtor and member of Governmental Affairs Committee with the Portland Metropolitan Association of Realtors, said her concerns are that she is not seeing a real conclusive set of scientific standards and information as what to do with the quality of our water. We are putting Band-Aids on something that needs to be pulled back in order to take a look at what needs to be done and solve the problem from the ground up. It is more cost effective to treat a lesser amount.

Commissioner Francesconi moved to accept the report and was seconded by Commissioner Hales.

Disposition: Accepted. (Y- 5)

550

TIME CERTAIN: 10:30 AM – Express City Council support for passage of the May, 2000 Local Option funding for the Portland Public Schools (Resolution introduced by Mayor Katz, Commissioners Francesconi, Hales, Saltzman and Sten)

Discussion: Mayor Katz noted that as elected officials they are allowed to testify.

APRIL 26, 2000

Commissioner Francesconi said he was proud to be on this Council because of each person's personal as well as political commitment to the schools. It is in the City's interest for this bond measure to pass. We are all committed to have a city where all of our citizens can compete in the 21st century and we want to provide equal opportunity to our citizen's to have that competition. The schools anchor our neighborhoods and we all want strong neighborhoods, you can not have that without a strong school. Our public schools keep us together as a community, not separated between rich and poor or by race or divisions.

David Wind, Vice President, US Bank, stated that no other urban area in America has a public school system that brings people together like Portland's. In our city 90% of families send their children to public school. Measure 26-2 gives us a chance to make a positive contribution to the schools. It also has support from the business community. To develop a diverse economy to meet the challenges of the 21st century a strong public school system is a critical component. It provides a well educated work force and a way to attract people and an investment in our community. Good schools educate good citizens.

Greg McPherson, resident of SE Portland said his children went through the Portland public schools, a system where the number of students was constant but the number of teachers has dropped by 442 from what it was when measure 5 was passed 10 years ago. Class sizes are large with 35 to 40 students per class. The measure offers the opportunity to have more to spread around and hire 70 teachers back. Parents like himself believe in public education and what it does for the community as a whole.

Julia Kelly-Echiverio, said she was a product of the Portland Public School system and is here today to articulate her experience going through middle school without any measure 5 effects but did see the effects of measure 5 in her high school years. Increased class size meant reduction of art programs and sports.

Dave Hamilton, Physics teacher at Franklin High School, President of the Oregon Science Teachers Association, said Measure 26-2 will allow them to purchase science text books for the district. Class size is an important issue and she appreciates Council's support of schools in the past few years and now.

Susan Scanlon, parent of 3rd grader at Forest Park Elementary, school team captain for the local option, and member of the local option campaign committee, said she has heard horror stories of book sharing and the such. She is involved with the Coalition for School Funding Now, a grass roots effort to support funding at the state level. They were not very successful, but allowed schools to go back to their local voters for their school district.

Mayor Katz stated she thought one billion dollars was very successful.

Ms. Scanlon stated they were not as successful as they would have liked and that other school districts around Oregon are doing the same thing. The passage of the local option will provide much needed revenues to Portland Public Schools and will send a powerful message to our State Legislature that Oregonians really care about public education and do not mind digging deeper to make sure it is adequately funded.

Commissioner Saltzman wondered if Doctor Canada could give an update on plans for summer school.

APRIL 26, 2000

Ben Canada, Superintendent Portland Public Schools stated he is prohibited from speaking in favor of the local option, but he can state factually that when he left Louisiana in 1967 from a segregated community in the deep south, he thought he would never see conditions for public school children that he had left, he had access to the arts that children in Portland do not have access to. He asked the community to think about whether or not they would want the children in Portland to go through what he went through as a student in a segregated environment to not have access to a quality and complete education. Those who vote determine the future of a community. They are grateful for the funding and have summer school on target. They identified children through both test scores and recommendations from teachers. Summer school will be larger than it was last year and could be over 5,000 students.

Disposition: Resolution No. 35882. (Y- 5)

Mayor Vera Katz

- *571** Amend intergovernmental agreement with the Metropolitan Service District for consolidation of regional convention, trade and performing arts facilities to return operational control of the Civic Stadium to the City (Ordinance; amend Contract No. 25921)

Discussion: Ruth Ross, Office of Finance Administration said this is a follow up to the Ordinance that was heard two weeks ago that extended the time period during which the City and Metro were negotiating a successful conclusion to amending the consolidation agreement. All the parties have gotten what they want and need out of this. It provides for the return of Civic Stadium to the city in a flexible timeline but she is not certain when the Portland Family Entertainment (PFE) deal is going to close. The deal could close between June 21st and August 2nd. It provides disposition of the fund balance in an equitable manner. The facilities are not subject to excise tax. Disposition of the inventory of the stadium is between things that need to be retained by the stadium for operation and equipment that is going to be used by Portland Center for the Performing Arts. Safeguards are in place for continued City oversight of the operation of the PCPA facility. PCPA will continue to be administered by Metro under the operation of Metropolitan Exposition and Recreating Commission (MERC).

Commissioner Saltzman asked if we were looking at a period when the City has to operate the stadium before PFE takes over.

Ruth Ross said no as MERC will continue to operate the stadium until PFE has closed its arrangement. Once a termination date has been announced and PFE takes over MERC will continue to provide some employee assistance to aid PFE.

Mayor Katz said she knows they are happy to finish this part of the assignment and there are many more pieces.

Disposition: Ordinance No. 174377. (Y-5)

- 572 Amend Title 33, Planning and Zoning, to clarify how Basic Utilities are regulated (Second Reading Agenda 547; amend Code Title 33)

Commissioner Sten abstained from the vote as he missed the debate on this item.

Disposition: Ordinance No. 174378. (Y-4) Commissioner Sten abstained.

Commissioner Charlie Hales

- *573 Authorize a contract and provide for payment for construction of the SE Foster Road at Jenne Road street improvement project (Ordinance)

Discussion: Brett Kesterson, Portland Office of Transportation gave the background of this project. They have developed projects to improve the roadway to city standards and address the safety concerns. Five different projects were developed; three intersections at Jenne, 162nd and Barbra Welch and two roadway segments from 136th and Barbra Welch and Barbra Welch to 162nd as logical sections to improve. Some projects extend beyond five years because development is occurring at 162nd and Jenne creating additional demands. Developers have contributed money for the improvements for this intersection and there is some money from the system development charge fund. They are working with the citizens of Pleasant Valley to develop a citizens advisory committee and they needed to look at the full build out to understand the impact of the decisions, how the alignment should look and what the improvements would be. They had helpful input from the environmental community, Oregon Department of Fish and Wildlife, U.S. Fish and Wildlife Service and Johnson Creek Watershed Council.

Commissioner Saltzman said they have an application to GWEB for money for the 162nd and Foster, and asked if we had heard from them.

Mr. Kesterson said they had heard from them yesterday and they denied it, but gave them a period until May 5th to respond back with more information.

Paul Gershon, Pleasant Valley Neighborhood Association, who lives in one of the new developments that is causing much of the new congestion that occurs there said he wanted to say thank you to Mr. Kesterson and the traffic department. They have done a terrific job and this is only the beginning of a lot of different challenges.

Linda Bauer, President, Powell Valley Neighborhood Association, said thank you.

Disposition: Ordinance No. 174379. (Y-5)

- *574 Amend the Comprehensive Plan Map and change the zone of property at 12301 and 12435 NE Glisan Street from CO1 (Office Commercial 1) to CG (General Commercial) and from R7 (Medium Density Single-dwelling Residential) to CG (General Commercial) with a Buffer Zone overlay on the current Single-dwelling Residential parcel and on the CG (General Commercial) parcel to the immediate west thereof (Previous Agenda 548; LUR 99-00875 CP ZC)

Discussion: Mayor Katz noted that she and Commissioner Sten were not there so she handed the gavel over to Commissioner Hales.

APRIL 26, 2000

Commissioner Hales said all they need to do is have a role call as they had already heard everything and have no change in the findings or anything else. It was carried forward on the theory that people would be able to vote. A moment could be taken to verbally review the record.

Ben Walters, City Attorney, said if Mayor Katz and Commissioner Sten were not present at the hearing they could take a moment to recess Council and review the record. If not it will be carried over possibly a week.

Mayor Katz stated she would prefer to carry it over another week and since there was not opposition to taking a look.

Mr. Walters said that would give them the opportunity to review the record and come back next week with all five members prepared to vote.

Mayor Katz said if there were no objections they will bring it back next week.

Disposition: Continued to May 10, 2000 at 2:00 p.m.

Commissioner Dan Saltzman

575 Contract with US West Communications, Inc., for the upgrade of the Enhanced 9-1-1 telephone system at the Bureau of Emergency Communications (Ordinance)

Discussion: Commissioner Saltzman made a motion to set this over.

Commissioner Francesconi seconded.

Commissioner Saltzman stated there have been some last minute details that need to be worked out for at least two weeks.

Mayor Katz hearing no objections so ordered.

Disposition: Continued to May 10, 2000 at 9:30 a.m.

Commissioner Erik Sten

***576** Contract with Portland Community Reinvestment Initiatives for \$50,000 for the development of affordable rental housing and provide for payment (Ordinance)

Discussion: Ben Walters, City Attorney said it was Commissioner Sten's choice to abstain, but did not think he was required to under the law.

Disposition: Ordinance No. 174380. (Y-4) Commissioner Sten abstained.

APRIL 26, 2000

City Auditor Gary Blackmer

- *577** Create a local improvement district to construct street and sewer improvements in the SE Ivon Ct/125th Ave HCD Local Improvement District (Hearing; Ordinance; C-9962)

Disposition: Ordinance No. 174381. (Y-5)

- 578** Assess property for sidewalk repair by the Bureau of Maintenance for billing processed through March 17, 2000 (Hearing; Ordinance; Y1038)

Disposition: Passed to 2nd Reading May 3, 2000 at 9:30 a.m.

At 11:23 a.m., Council Adjourned.

APRIL 26, 2000

WEDNESDAY, 2:00 PM, APRIL 26, 2000

**DUE TO THE LACK OF AN AGENDA
THERE WAS NO MEETING**

MAY 2, 2000

TUESDAY, 12:00 PM, MAY 2, 2000

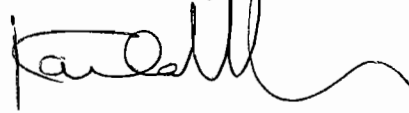

579

Pursuant to Section 2-302 of the City of Portland, Oregon, Charter, as of Noon on Tuesday, May 2, 2000, I hereby assign myself, Mayor Vera Katz, commissioner in charge of the Bureau of General Services (Ordinance)

Disposition: Ordinance No. 174382.

GARY BLACKMER

Auditor of the City of Portland

A handwritten signature in black ink, appearing to read 'Karla Moore-Love', with a long horizontal flourish extending to the right.

By Karla Moore-Love
Acting Clerk of the Council
