RESTORE THE HEALTH AND SAFETY OF FOREST PARK

Forest Park has been identified as a unique urban wilderness environment protected by land use law, as stated in the Forest Park Natural Resources Management Plan. For the past 70 years Forest Park has been carefully managed with preservation and restoration of native resources as the highest priority. As a result, today Forest Park has more native species than any other city park in the nation. Scientists have determined that Forest Park has more interior forest habitat than any other city park in the world. However, nationwide this habitat and many of the species it supports are threatened. The Management Plan calls for passive recreational use that does not degrade the natural resources and requires that trail management support safe use by all user groups.

PETITION To: Mayor Hales, City Commissioners Fish, Novick, Fritz and Saltzman and Director of Portland Parks Abbate

- TO UPHOLD THE GOALS OF FOREST PARK NATURAL RESOURCES MANAGEMENT PLAN
- 92% OF PARK USERS ARE PEDESTRIANS. BICYCLES ARE ILLEGALLY TAKING OVER PEDESTRIAN-ONLY TRAILS IN FOREST PARK, CAUSING SAFETY HAZARDS AND DAMAGING TRAILS. PORTLAND PARKS AND RECREATION RESOURCES MUST BE PRIORITIZED TO ADDRESS THIS THREAT TO USER SAFETY. LAWS GOVERNING BICYCLES IN FOREST PARK MUST BE ENFORCED. NO NEW TRAILS SHOULD BE CONSIDERED UNTIL EFFECTIVE ENFORCEMENT IS IN PLACE. ACTIVITIES THAT THREATEN USER SAFETY OR HARM THE HEALTH OF THE PARK MUST BE PROHIBITED.

RESTORE THE HEALTH AND SAFETY OF FOREST PARK

Forest Park has been identified as a unique urban wilderness environment protected by land use law, as stated in the Forest Park Natural Resources Management Plan. For the past 70 years Forest Park has been carefully managed with preservation and restoration of native resources as the highest priority. As a result, today Forest Park has more native species than any other city park in the nation. Scientists have determined that Forest Park has more interior forest habitat than any other city park in the world. However, nationwide this habitat and many of the species it supports are threatened. The Management Plan calls for passive recreational use that does not degrade the natural resources and requires that trail management support safe use by all user groups.

RESTORE THE HEALTH AND SAFETY OF FOREST PARK

Forest Park has been identified as a unique urban wilderness environment protected by land use law, as stated in the Forest Park Natural Resources Management Plan. For the past 70 years Forest Park has been carefully managed with preservation and restoration of native resources as the highest priority. As a result, today Forest Park has more native species than any other city park in the nation. Scientists have determined that Forest Park has more interior forest habitat than any other city park in the world. However, nationwide this habitat and many of the species it supports are threatened. The Management Plan calls for passive recreational use that does not degrade the natural resources and requires that trail management support safe use by all user groups.

PETITION To: Mayor Hales, City Commissioners Fish, Novick, Fritz and Saltzman and Director of Portland Parks Abbate

- **TO UPHOLD THE GOALS OF FOREST PARK NATURAL RESOURCES MANAGEMENT PLAN**
- **92% OF PARK USERS ARE PEDESTRIANS. BICYCLES ARE ILLEGALLY TAKING OVER PEDESTRIAN-ONLY TRAILS IN FOREST PARK, CAUSING SAFETY HAZARDS AND DAMAGING TRAILS. PORTLAND PARKS AND RECREATION RESOURCES MUST BE PRIORITIZED TO ADDRESS THIS THREAT TO USER SAFETY. LAWS GOVERNING BICYCLES IN FOREST PARK MUST BE ENFORCED. NO NEW TRAILS SHOULD BE CONSIDERED UNTIL EFFECTIVE ENFORCEMENT IS IN PLACE. ACTIVITIES THAT THREATEN USER SAFETY OR HARM THE HEALTH OF THE PARK MUST BE PROHIBITED.**

Comments or Questions

I have been surprised by bikes coming around the corner on pedestrian only trails frequently and have seen bike
Good work!

I hike the Park several times per month. I also ride a Mtn bike but never on Park single track trails

I've made many comments over the past year

I love to walk and run in Forest Park, and worry about its health if single-track cyclists are given more free rein.
There is also a need for ongoing funding for critical maintenance programs such as invasive species management.

I also wrote a letter to Mayor Hales regarding this issue and have not received any response.

I love to walk on the trails at Forest Park and would like to see the park maintained long into the future.

Though I'm not a Portland resident, I treasure the regional aspect of Forest Park and use the trails frequently. Leif

Forest Park is not only a Portland but a regional treasure. Please don't let it continue to deteriorate.
I recently took a young woman from Vermont to FP from Germantown to Springville.

Wait until after the fluoridation election is over.

Will be out of the country until Oct.

Bicycles and walkers do not belong on the same trails. I've nearly been knocked down a couple of times by bikes

Thank you

I am saddened to see not only trails on the outer edges of Forest Park degraded by bicyclers, but the inner sections

I have lived in this neighborhood and walked in Forest Park for over 40 years. I have had many frightening encounters with bicyclists on speeding around blind corners on Wildwood Trail. I'm able to jump out of the way. I

most of the trails are not designed for both walkers with dogs and cyclists, I have had two narrow misses for collisions with well meaning cyclists - the combination of a rapidly expanding user population and cycle traffic will

I have so many wonderful memories wandering these trails as a child, and then again with neighborhood kids I've babysat or nannied for over the years. It would have been much more dangerous if not impossible to let a 3 year old explore the wonder of nature if there were the constant threat of a bicyclist racing down the trails. I am an avid biker and love biking, but it is also important for our community and for our children to keep trails pedestrian-only!

The forest area in Portland is a valuable resource. Please keep it viable for and accessible for years to come.
As a long time resident of the periphery of Forest Park, the increasing stress on this incredible habitat becomes more apparent. I would suggest that whatever stopgap measures we can introduce to reasonably control any further trail and parking areas impact would certainly be to the common good. Re-naming and increasing the the preservational commitment will best serve the public good. I feel that an annual parking permit system along with an additional license fee levied on the trail bike community would help facilitate the needed funds for this most

One winter day I was walking a puppy on the Cumberland trail. The puppy was on a 5' leash. We were almost at a corner going up hill and could not see the trail in front of us when suddenly around the corner, coming down the hill was a bicyclist. He was going fast and could not stop in the mud. I went to one side of the trail and the puppy, terrified, went to the other side. He went between us. I fortunately had the sense to drop the leash and the bicyclist rode over it. It was really frightening. We could have been badly hurt. I have walked almost every trail in Forest Park. The trails in Forest Park are narrow, sometimes steep and very slippery in the winter. I do not see how it would be possible to have trails with both bikes and pedestrians sharing the trail. In the last thirty years the use of the park has increased significantly. I no longer walk it on sunny summer weekends. So where would you put the

Why reward an inconsiderate user group by adding more trails for them to abuse? There are numerous options on land owned by metro or in logged off areas way out skyline--send them there where they will not intimidate. I use the trails of Forest Park as a blind person with a guide dog and I cannot jump out of the way when a cyclist approaches at any speed. Most riders do not observe common courtesy by staying completely off the trails that are dedicated for pedestrians. There is no enforcement or follow through on the laws. Also, I want to remind people that Forest Park is a place that can be accessed by bus for those unable to drive. Mountain bikers should think about the fact that they frequently intimidate every other user of Forest Park. There are not many choices for those. Have you thought about asking the political pac that has put up all this money to lobby the council to use their money to purchase land close to the city and give it to metro and parks and recreation. They could design their own park strictly for mountainbiking and it would be much better than trying to mix it up with pedestrians, children,

bikes have enough paths as it is
I am opposed to single track biking in Forest Park!!

I live at the start of Wildwood Trail. My husband and I are well in our 70's and walk almost daily, alone or with our grandchildren. On occasion a biker has come along and almost run us off the trail./ It is scary and dangerous.

Cycling shouldn't be a crime. Let's work with the bike community to promote safe bike use in Forest Park.
Thank You!

Our hiking group from the PSU Retirement Assn RAPS range in age from the 70's thru the 80's and we are no competition with bicycles who tear up the trails to boot.
What a blessing there is a citizen effort to bring about accountability to the original plan for Forest Park. Great thanks for your labors to maintain an outdoor sanctuary of this magnitude. My connection to the park began in the late 70's, when I was going through some very stressful personal times. As a new Trail's Club of Oregon member, I joined a group at Wallace Park, led by Fran, every Wednesday to hike one of the many sections of trail in Forest Park. Fran took over as leader when the Portland Parks hiking program disappeared due to budget adjustments and on his passing the Trails Club picked up his duties in honor of earlier involvement in securing the park. During that time of my life, I lived for that day where I meet up with that group of healthy hikers, most 2 or 3 times my age, who could hike the socks off me. Besides keeping me in shape for a weekend club hike, I benefitted from the calming reinforcement of the forest and the conversation of stable people. Ding Cannon, a club member and person responsible for facilitating the committee of 50 who implemented earlier master plans for the park, was among the most influential of those I spoke with. He knew the park like the back of his hand and shared many amazing stories with me. One in particular warned me to always be prepared. The club now has a living memorial to an experience hiker who did not survive unexpected perilous conditions on one of Ding's outings. I do remember being grateful for

Please keep Forest Park a passive use only park. Many families and individuals use this park to hike and walk in. Forest Park is a wonderful sanctuary in the city. Just go out on a trail and listen to the peace and quiet. Look up at and through the branches to the sky. Listen to the birds sing. This peaceful place so close to home is wonderful way to get away from the stresses of life. Forest Park is not the place for the high speed sport of single track bike

as a regular hiker of Forest Park. I am truly saddened to hear about this proposal. Please reconsider upholding this plan and keep the trails safe and peaceful to walk on.

I have belonged to the Trails Club of Oregon for many years and think making a bicycle race track in Forest Park would be an egregious affront to the good men who worked hard to establish the park as an environmental oasis in the city. There are certain elements here who would be happy to destroy that treasure for their selfish uses. Please Judging from the blatant disregard of traffic rules and laws of bicyclists on city streets, I have grave doubts that bicyclists will behave in an ethical and safe way in Forest Park. A bicyclist ran a red light coming off the Hawthorne bridge once and missed hitting me by an inch. In the gorge, if my friend and I hadn't sat down on a log to talk, we The disparate speed of vehicles such as bicycles compared to pedestrians does not allow reaction time to get out This proposal for bicycles is very upsetting.

Forest Park is a unique treasure that must be protected for generations to come. Single track bike riding is not a passive use and so does not meet the guidelines of the original management plan.

Marcy Houle [newmoonfarms@gmail.com]

Hi, Susan:

10/1/13

(3)

Thank you for your help and your flexibility! Yes, I will confirm that I will be there, with Catherine, on November 20th, to formally present our Forest Park petition to the City Council.

From: Catherine Thompson [mailto:thompsoca@gmail.com]

Sent: Tuesday, October 01, 2013 1:48 PM

To: Parsons, Susan

Cc: Marcy Houle

Subject: Re: Restore the Health and Safety of Forest Park

since Marcy cannot make it in October and we have been working together on this for so long, I'd like to postpone until the date in November. Thank you Sue for your patience and flexibility.
Catherine Thompson

Hello Sue,

Marcy Houle and I would like to formally present our petition to City Council. We, along with hundreds of other petitioners, are asking City Council to direct the Parks Department to follow the Forest Park Natural Resources Management Plan and to protect pedestrians in Forest Park from the hazardous activity of illegal cycling on pedestrian only trails.

our petition states:

Forest Park has been identified as a unique urban wilderness environment protected by land use law, as stated in the Forest Park Natural Resources Management Plan. For the past 70 years Forest Park has been carefully managed with preservation and restoration of native resources as the highest priority. As a result, today Forest Park has more native species than any other city park in the nation. Scientists have determined that Forest Park has more interior forest habitat than any other city park in the world. However, nationwide this habitat and many of the species it supports are threatened. The Management Plan plan calls for passive use that does not degrade the natural resources and requires that trail management support safe use by all user groups.

WE PETITION Mayor Hales, City Commissioners Fish, Novick, Fritz and Saltzman and Director of Portland Parks Abbate

-TO UPHOLD THE GOALS OF FOREST PARK NATURAL RESOURCES MANAGEMENT PLAN

- 92% OF PARK USERS ARE PEDESTRIANS. BICYCLES ARE ILLEGALLY TAKING OVER PEDESTRIAN-ONLY TRAILS IN FOREST PARK, CAUSING SAFETY HAZARDS AND DAMAGING TRAILS. PORTLAND PARKS AND RECREATION RESOURCES MUST BE PRIORITIZED TO ADDRESS THIS THREAT TO USER SAFETY. LAWS GOVERNING BICYCLES IN FOREST PARK MUST BE ENFORCED. NO NEW TRAILS SHOULD BE CONSIDERED UNTIL EFFECTIVE ENFORCEMENT IS IN PLACE. ACTIVITIES THAT THREATEN USER SAFETY OR HARM THE HEALTH OF THE PARK MUST BE PROHIBITED.

We look forward to presenting the signed petition to City Council on October 30th.

Sincerely,

Catherine Thompson

2524 SW 17th Avenue, Portland, OR 97201
