

2.4.2 Map B - Industrial Facilities

Map B for the Part 2 permit application consists of the locations of 2,260 industries which may discharge storm water associated with industrial activity (see Section 2.3). This map was developed by METRO utilizing the tax lot numbers and SIC codes contained in the industrial inventory database. The industrial parcels are shaded and the tax lot number is plotted in the center of the parcel. The map includes the permit, sub-basin, combined sewer area, and sump drainage area boundaries. Additionally, Map B shows the locations of municipal landfills and hazardous waste treatment, storage, and disposal facilities.

2.4.3 Map C - Existing Land Use

The land use map submitted in the Part 1 permit application was based on comprehensive zoning plans. During the Part 2 process, a map showing actual current land use was developed by the Metropolitan Services District (METRO) using the Multnomah County Tax Assessor's database. If the land use code for a parcel was not defined in the tax assessor's database, METRO utilized one of the following sources to designate the land use for that parcel (listed in order of precedence):

- Parks & Open Space Map developed by METRO
- Vacant Lands Map developed by METRO
- Comprehensive zoning plans

The following seven land use categories, with their associated land use codes, were developed:

- Light Residential: Single-family residential areas; land use code B.
- Heavy Residential: Multi-family residential areas, such as apartments and condominiums; land use codes C, D, E, F, T, and W.
- Commercial: Restaurants, stores, offices, warehouses, and hotels; land use codes H, I, J, K, L, M, N, O, P, Q, R, S, U, V, YB, YC, YD, YE, YF, YH, YI, and Z.
- Industrial: Manufacturing and utilities; land use code G.
- Vacant: Undeveloped land; land use code A.

- **Parks & Open Space:** Parks, picnic areas, and natural resource areas; land use code YA and YG.

The land use data and acreage breakdowns by sub-basin and jurisdiction which were used to calculate pollutant loads for the permit area are presented in Section 3.4.2.1. This information was based upon data received as of September 1992.

2.4.4 Map D - Jurisdictional Boundaries

The jurisdictional boundaries have been updated for the Part 2 permit application. Map D reflects changes made since the Part 1 permit application was submitted.

2.4.5 Map E - Topography and Wetlands

The permit, combined sewer, and sump drainage area boundaries have been updated for the Part 2 permit application and are shown on Map E. Map E also shows the locations of wetlands in the permit area.
