Presenter name: None (Tara Anderson, if needed)

Purpose of proposed legislation and background information:

This legislation would authorize application to the U.S. Department of Housing and Urban Development for a grant in the amount of \$3,000,000 for the implementation of lead-based paint hazard control activities and \$400,000 to address in-home health and safety hazards and for the administration of these activities.

Financial and budgetary impacts:

This lead hazard and healthy homes grant could bring approximately \$3,400,000 in federal funds to the community for a grant period of three years. The grant requires a 25% match being met by a contribution from the Portland Water Bureau in the form of rate payer dollars that are used for lead poisoning education and outreach in the community.

Community impacts and community involvement:

This grant application is being submitted to continue funding support for an established program that has existed at the Portland Housing Bureau since 1996 and provides direct services to low-income households with children.
