* Many volumes include multiple items. The tables of contents for each of these volumes are found on subsequent pages of this document.

** GIS files necessary to reproduce the adopted maps have been identified in the table of contents have been provided on a computer-readable media, attached.

*** Video and/or audio recordings of PSC and Council deliberation are itemized in the table of contents, and provided on a computer-readable media, attached. The lists of oral testimony include links to You-Tube videos, including timestamps. An electronic copy of the corresponding video files have been provided in the attached media

How to use this Table of Contents

The record has been divided up into volumes, each containing a specific element of the City’s decision-making process. Each volume is arranged in reverse chronological order, and has its own Table of Contents identifying specific items in that volume. The Volumes are identified with a two or three-digit code, such as:

1.1.A

The first number identifies the phase of the process (such as Planning and Sustainability Commission, or City Council). For example, all volumes related to City Council proceedings start with “1.X.X”.

The second number identifies a specific element of the record of that process (such as adopted or recommended reports, testimony, staff presentations, etc.). For example, all volumes of testimony to the City Council starts with “1.3.X”.

The final digit (a letter) is used when an element of the record is especially large. This was done so that volumes were kept to a manageable file size. Hearings testimony at each stage is subdivided so that each volume is no more than 500-700 pages, and is less than a 20MB file size. For example, Volume “1.3.F” is all testimony to City Council between 3/18/16 and 4/11/16.

Suggested citation format example: “Volume 2.3.C, page 3380, testimony of Tamara DeRidder”
