Presenter name: Jennifer Li

Purpose of proposed legislation and background information:

In 2015, City Council granted authorization to Portland General Electric dba World Trade Center Properties (WTC) in the form of a temporary, revocable permit, to allow WTC to install electric car charging stations in the right of way as a demonstration project along SW Salmon between SW 2nd and SW 1st. The temporary, revocable permit was for a limited, 2-year duration and will expire in August 2017. The City and WTC have now negotiated a franchise agreement for a 5-year term which would replace and supersede the original temporary, revocable permit granted in 2015. However, because of the time required to complete the formal franchising process required by the City Charter, WTC has asked the City Council to consider granted to WTC a temporary, revocable permit under substantially similar terms as the new franchise agreement. The temporary, revocable permit will allow WTC to proceed immediately. The new franchise agreement will come before City Council for consideration once the formal franchising process has been completed, a process which can take up to 4-6 months.

Financial and budgetary impacts:

The City will receive franchise fees for the use of the right of way. The annual amount will be the greater of \$3,000 or 5% of gross revenues derived from the operation of the electric vehicle charging stations in the right of way. This reflects an increase over the 2015 agreement, which was \$1,000 annually.

Community impacts and community involvement:
