Chapter 2 – Community Involvement

Goal 2.B: Social justice and equity. The City of Portland seeks social justice by expanding choice and opportunity for all community members, recognizing a special responsibility to identify and engage, as genuine partners, under-served and under-represented communities in planning, investment, implementation, and enforcement processes, particularly those with potential to be adversely affected by the results of decisions. The City actively works to improve its planning and investment-related decisions to achieve equitable distribution of burdens and benefits, and address past injustices.

Goal 2.E: Meaningful participation. Community members have meaningful opportunities to participate in and influence all stages of planning and decision-making. Public processes engage the full diversity of affected community members, including under-served and under-represented individuals and communities. The City will seek and facilitate the involvement of those potentially affected by planning and decision-making.

Goal 2.F: Accessible and effective participation. City planning and investment decision-making processes are designed to be culturally accessible and effective. The City draws from acknowledged best practices and uses a wide variety of tools, including those developed and recommended by under-

served and under-represented communities, to promote inclusive, collaborative, culturally-specific, and robust community involvement.
