Subject: TSP3

Sirs:

I am writing in response to the recent City responses to written comments from citizens on the TSP Stage 3 update.

I am deeply disappointed with the City's responses. The response to my comment did not address any of the issues I raised. Instead, the City staff copied and pasted a partial statement, which was repeated for many other peoples' comments. I must ask that you provide the full text of the City response. What you provided was interrupted in mid sentence.

Additionally, the clear lack of consideration of issue I raised and issues raised by my neighbors insults us. Instead, the City said that they are required to modify the designation of our street due to code. There is no evidence that any consideration was made to a) grandfathering current uses or b) revising the code to reflect current, historic use. Nor was there any consideration of addressing the problems caused on our street by the City's past actions in this part of the city.

You, sirs, owe the citizens of Southeast Portland an apology for summarily dismissing our legitimate concerns.
