Having reviewed the email links from the “Review TSP Stage 3 Proposed Draft”, I don’t see any mention of the NW neighborhood, specifically Skyline and efforts to reduce traffic through the West Hills. After reading many of the comments, I see that many residents are frustrated with traffic in their areas and that priorities for addressing these issues must be set. Has the NW, specifically the area mentioned above (Cornell and Skyline) been prioritized in any way ( plans for bike lanes, easier access to public transit, etc.)? If so, could you please provide a link to the details? If not, could you help me understand why?
