

IMPACT STATEMENT

Legislation title: *Authorize a contract with the lowest responsible bidder for the Foster Streetscape Project, SE 50th to 92nd Ave (Ordinance)

Contact name: Rich Newlands

Contact phone: x7780

Presenter name: n/a

Purpose of proposed legislation and background information:

To allow the Foster Rd Streetscape Project to proceed to bidding for a construction contract.

The project implements the Foster Rd Transportation and Streetscape Plan, adopted by City Council in 2014. Funding of the project comes from four sources: federal grants in the total amount of \$3,313,400, Portland Prosper urban renewal funds in the amount of \$1,940,156, PBOT System Development Charge funds dedicated to Foster Rd in the amount of \$600,000, and Fix Our Streets funds dedicated to Foster Rd paving, east of 82nd Ave, in the amount of \$3,000,000. The total project cost is \$8,853,500.

Financial and budgetary impacts:

Level of project estimate confidence is moderate.

No change to PBOT budget- project is in current CIP for FY 17/18

No changes in staffing levels.

Funding comes from Prosper Portland, FOS, SDC and a federal grant.

Community impacts and community involvement:

The project will significantly change operations and aesthetics on SE Foster Rd. The main design features are primarily intended to improve multi-modal safety on one of Portland's High Crash Corridors. The new three lane street cross-section will reduce the auto crash rate, improve pedestrian crossing safety, and provide separated bicycle facilities. There is an auto capacity tradeoff associated with the changes. It is estimated that during the peak hours that up to a third of the existing auto traffic volume will divert to adjacent arterial routes, such as SE Powell Blvd, Woodstock Blvd and Holgate Blvd. Modeling also indicates that these alternative routes have the capacity to accommodate the change and stay within regional capacity guidelines.

The improvements to be constructed were developed through a 16 month long public involvement process that ended in June of 2014 when City Council unanimously adopted the recommendations contained within the Foster Road Transportation and Streetscape Plan. The public involvement process

A Stakeholder Advisory Committee made up of neighborhood, community and business interests was assembled to guide development of the project recommendations, meeting 12 times over the course of the plan development process. Five open house events were held with a total attendance of approximately 450. Staff as also provided

project updates and opportunities for public comment at a variety of other community based organization and events.

Fliers and mailings about open house events were sent to over 15,000 households and businesses in the project area. Translations were available in Spanish, Russian and Vietnamese languages.

Overall support for the project recommendations, which include reducing the number of travel lanes on the road to provide the space for pedestrian crossing improvements and bicycle facilities, has been demonstrated from both residential and business community members. Testimony at Council in 2014 indicated strong community based support for the project. While more recently several businesses on Foster have put up window displays in opposition to the project, the Foster Area Business Association and several of the adjacent neighborhood associations have reiterated their support for the project.
