e-Builder Contract Amendment

Gayle Bast | Sr. Business Systems Analyst | Bureau of Environmental Services

1/23/18

ENVIRONMENTAL SERVICES
CITY OF PORTLAND

NICK FISH, COMMISSIONER
MICHAEL JORDAN, DIRECTOR

Project Requirements

- Over 600 people use the e-Builder software to manage all aspects of BES Capital Improvement Program projects.
- The initial software license and support term is expiring and needs to be renewed.
- Administrator and trainer training is required for new staff.

e-Builder's web-based, hosted, construction program management information software is used to manage multi-project construction programs throughout all stages of development from planning through construction and into operations.

Project Objectives

- Extend license and support for BES through August 31, 2022.
- Provide training for BES staff to administer and further configure the software and to train end users.
- Allows BES to continue its successful implementation of the program/project management software; and to expand its use to additional business processes.

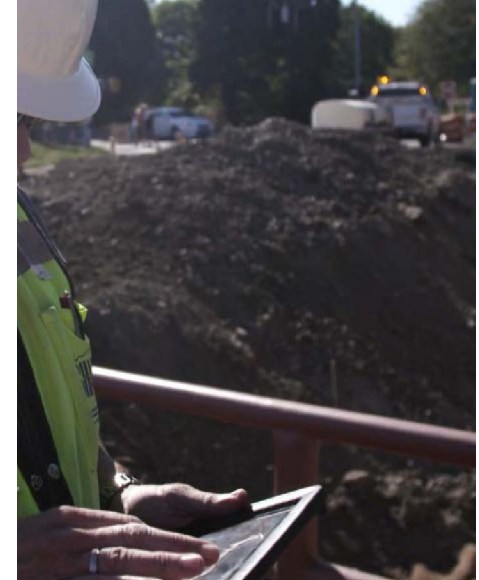

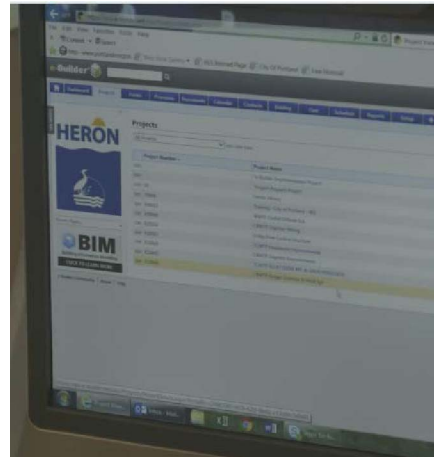

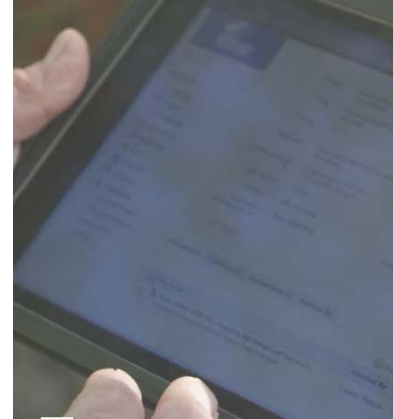

Project Overview

- License and support under the original contract for BES ends February 28, 2018.
- Amendment 1 extended the contract term to August 31, 2022 and authorized PBOT to acquire licenses and implementation and support services.
- This ordinance for Amendment 2 authorizes BES to extend license and support through August 31, 2022; and to acquire training for BES software administrators and trainers.

Project Overview

- Website login to see all information about a project from anywhere
- Manage documents, communicate with team, create reports
- Contractor creates RFIs, Submittals, Invoices
