**To:** Portland Design Review Commission

**From:** Michael Kiser, Project Manager, Division Transit Project

**cc:** Teresa Boyle (PBOT), Bob Hastings (TriMet), Steve Witter (TriMet),  
Jesse Stemmler (TriMet)

**Subject:** Presentation of Division Transit Project to Design Review Commission

---

The Division Transit Project Team looks forward to the opportunity of presenting to the Design Review Commission on Thursday, December 6<sup>th</sup>, 2018.

The Division Transit Project is an enhanced bus project that will improve travel between Downtown Portland, East Portland and Gresham with easier, faster and more reliable bus service. Improvements associated with the project include newly constructed station platforms spaced approximately every 1/3 mile along station along the Division corridor. Additional improvements include traffic signal improvements, pedestrian safety and accessibility upgrades and other corridor wide enhancements that complement the City of Portland's Vision Zero safety efforts.

Our project is asking the Commission to review and provide feedback on the station shelter and amenity package as they are currently a "non-standard transit element in the right-of-way". With future enhanced transit planned for the region, these elements are envisioned to become standard and replicated in other enhanced transit corridors.

To assist with your review, we are including the following project materials ahead of our meeting:

- **Division Transit Brochure** - Project summary and background information
- **Corridor Map** – Illustrates the Division Transit corridor with station locations

We look forward to meeting with you on December 6<sup>th</sup>.
