Say No to the Zenith Oil Terminal in Portland!

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland and the Columbia River Gorge National Scenic Area. We urge the City of Portland to stop issuing new permits for Tar Sands shipments through our City.

Please use your authority to protect Pacific Northwest residents from these risks by halting Zenith Tar Sands oil trains in Portland.

Providing your email will subscribe you to our Action Alerts which is the best way to stay updated on our conservation issues (only a few important emails a month). Thank you for joining our online community! Providing a cell number may get you text alerts for actions in the future – you can cancel alerts at any time. Checking a box will subscribe you to:

Monthly E-News: Recent news, upcoming events, ways to get involved, and what's happening within Friends of the Columbia Gorge on the 4th Thursday of the month.

Hiking Alerts: Stay updated on the seasonal Gorge hikes, Friends guided outings, trail closures/openings, and more - Sent bi-weekly, March-October.

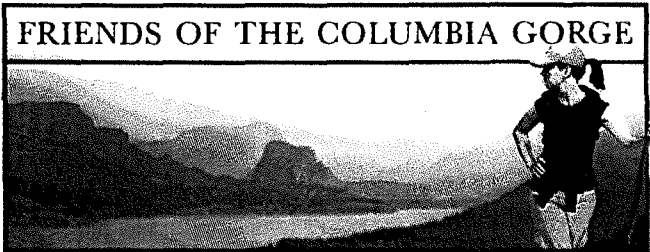

Stewardship E-News: Alerts for stewardship work parties, trail rebuilding, and invasive species removal in the area of the Eagle Creek Fire and elsewhere.

Say No to the Zenith Oil Terminal in Portland!

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland and the Columbia River Gorge National Scenic Area. We urge the City of Portland to stop issuing new permits for Tar Sands shipments through our City.

Please use your authority to protect Pacific Northwest residents from these risks by halting Zenith Tar Sands oil trains in Portland.

Providing your email will subscribe you to our Action Alerts which is the best way to stay updated on our conservation issues (only a few important emails a month). Thank you for joining our online community! Providing a cell number may get you text alerts for actions in the future – you can cancel alerts at any time. Checking a box will subscribe you to:

Monthly E-News: Recent news, upcoming events, ways to get involved, and what's happening within Friends of the Columbia Gorge on the 4th Thursday of the month.

Hiking Alerts: Stay updated on the seasonal Gorge hikes, Friends guided outings, trail closures/openings, and more - Sent bi-weekly, March-October.

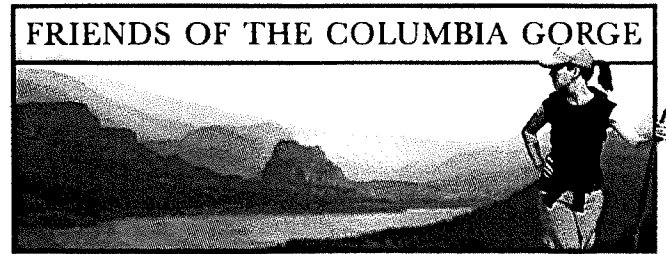

Stewardship E-News: Alerts for stewardship work parties, trail rebuilding, and invasive species removal in the area of the Eagle Creek Fire and elsewhere.

Say No to the Zenith Oil Terminal in Portland!

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland and the Columbia River Gorge National Scenic Area. We urge the City of Portland to stop issuing new permits for Tar Sands shipments through our City.

Please use your authority to protect Pacific Northwest residents from these risks by halting Zenith Tar Sands oil trains in Portland.

Providing your email will subscribe you to our Action Alerts which is the best way to stay updated on our conservation issues (only a few important emails a month). Thank you for joining our online community! Providing a cell number may get you text alerts for actions in the future – you can cancel alerts at any time. Checking a box will subscribe you to:

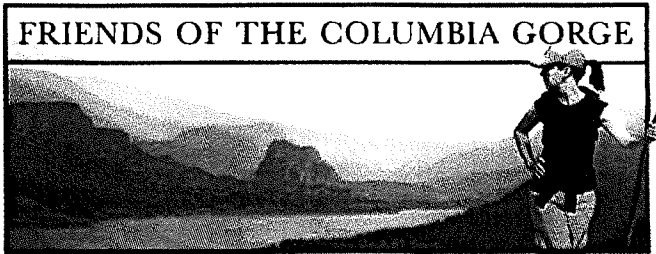

Monthly E-News: Recent news, upcoming events, ways to get involved, and what's happening within Friends of the Columbia Gorge on the 4th Thursday of the month.

Hiking Alerts: Stay updated on the seasonal Gorge hikes, Friends guided outings, trail closures/openings, and more - Sent bi-weekly, March-October.

Stewardship E-News: Alerts for stewardship work parties, trail rebuilding, and invasive species removal in the area of the Eagle Creek Fire and elsewhere.

Say No to the Zenith Oil Terminal in Portland!

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland and the Columbia River Gorge National Scenic Area. We urge the City of Portland to stop issuing new permits for Tar Sands shipments through our City.

Please use your authority to protect Pacific Northwest residents from these risks by halting Zenith Tar Sands oil trains in Portland.

Scanned Stop Zenith Petitions File Cover Sheet

Name of File: Stop_Zenith_Petitions_2.pdf

Number of Names in the File: 360

Date Scanned: 9/14/2019

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.

Deadline to return: July 1st.

Return Petition by mail or in person to: 350pdx, 1820 NE 21st, Portland OR 97212

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "**Toxic Inhalation Hazard**" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- *Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.*
- *Deny any upcoming permits, appeals, and exemptions for Zenith's facility.*
- *Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.*

Deadline to return: July 1st.

Return Petition by mail or in person to: 350pdx, 1820 NE 21st, Portland OR 97212

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a **"Toxic Inhalation Hazard"** warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.

Deadline to return: July 1st.

Return Petition by mail or in person to: 350pdx, 1820 NE 21st, Portland OR 97212

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.

Providing your email will subscribe you to our Action Alerts which is the best way to stay updated on our conservation issues (only a few important emails a month). Thank you for joining our online community! Providing a cell number may get you text alerts for actions in the future – you can cancel alerts at any time. Checking a box will subscribe you to:

Monthly E-News: Recent news, upcoming events, ways to get involved, and what's happening within Friends of the Columbia Gorge on the 4th Thursday of the month.

Hiking Alerts: Stay updated on the seasonal Gorge hikes, Friends guided outings, trail closures/openings, and more - Sent bi-weekly, March-October.

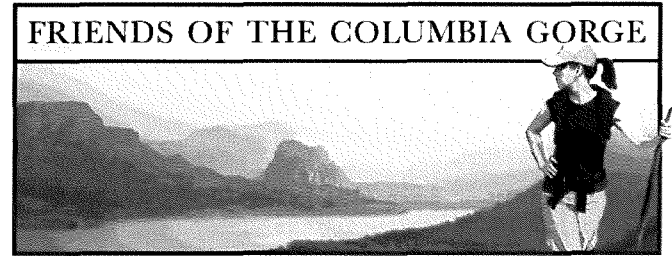

Stewardship E-News: Alerts for stewardship work parties, trail rebuilding, and invasive species removal in the area of the Eagle Creek Fire and elsewhere.

Say No to the Zenith Oil Terminal in Portland!

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland and the Columbia River Gorge National Scenic Area. We urge the City of Portland to stop issuing new permits for Tar Sands shipments through our City.

Please use your authority to protect Pacific Northwest residents from these risks by halting Zenith Tar Sands oil trains in Portland.

Providing your email will subscribe you to our Action Alerts which is the best way to stay updated on our conservation issues (only a few important emails a month). Thank you for joining our online community! Providing a cell number may get you text alerts for actions in the future – you can cancel alerts at any time. Checking a box will subscribe you to:

Monthly E-News: Recent news, upcoming events, ways to get involved, and what's happening within Friends of the Columbia Gorge on the 4th Thursday of the month.

Hiking Alerts: Stay updated on the seasonal Gorge hikes, Friends guided outings, trail closures/openings, and more - Sent bi-weekly, March-October.

Stewardship E-News: Alerts for stewardship work parties, trail rebuilding, and invasive species removal in the area of the Eagle Creek Fire and elsewhere.

Say No to the Zenith Oil Terminal in Portland!

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland and the Columbia River Gorge National Scenic Area. We urge the City of Portland to stop issuing new permits for Tar Sands shipments through our City.

Please use your authority to protect Pacific Northwest residents from these risks by halting Zenith Tar Sands oil trains in Portland.

Providing your email will subscribe you to our Action Alerts which is the best way to stay updated on our conservation issues (only a few important emails a month). Thank you for joining our online community! Providing a cell number may get you text alerts for actions in the future – you can cancel alerts at any time. Checking a box will subscribe you to:

Monthly E-News: Recent news, upcoming events, ways to get involved, and what's happening within Friends of the Columbia Gorge on the 4th Thursday of the month.

Hiking Alerts: Stay updated on the seasonal Gorge hikes, Friends guided outings, trail closures/openings, and more - Sent bi-weekly, March-October.

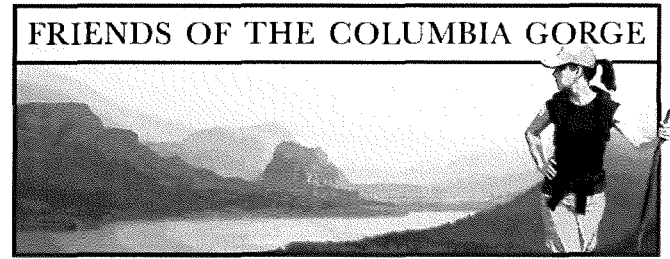

Stewardship E-News: Alerts for stewardship work parties, trail rebuilding, and invasive species removal in the area of the Eagle Creek Fire and elsewhere.

Say No to the Zenith Oil Terminal in Portland!

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland and the Columbia River Gorge National Scenic Area. We urge the City of Portland to stop issuing new permits for Tar Sands shipments through our City.

Please use your authority to protect Pacific Northwest residents from these risks by halting Zenith Tar Sands oil trains in Portland.

Scanned Stop Zenith Petitions File Cover Sheet

Name of File: Stop_Zenith_Petitions_4.pdf

Number of Names in the File: 155

Date Scanned: 9/14/2019

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a **"Toxic Inhalation Hazard"** warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a **"Toxic Inhalation Hazard"** warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- *Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.*
- *Deny any upcoming permits, appeals, and exemptions for Zenith's facility.*
- *Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.*

Deadline to return: July 1st.

Return Petition by mail or in person to: 350pdx, 1820 NE 21st, Portland OR 97212

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.

Deadline to return: July 1st.

Return Petition by mail or in person to: 350pdx, 1820 NE 21st, Portland OR 97212

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland. **We urge the City of Portland to stop issuing new permits for Tar Sands shipments through our City.**

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and our air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

We urge you to use your authority to protect Pacific Northwest residents from these risks by halting Zenith Tar Sands oil trains in Portland.

Return Petition by mail or in person to: 350pdx, 1820 NE 21st, Portland OR 97212

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland. **We urge the City of Portland to stop issuing new permits for Tar Sands shipments through our City.**

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and our air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

We urge you to use your authority to protect Pacific Northwest residents from these risks by halting Zenith Tar Sands oil trains in Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a **"Toxic Inhalation Hazard"** warning, pose a severe risk to our people, waterways, land and our air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

We urge you to use your authority to protect Pacific Northwest residents from these risks by halting Zenith Tar Sands oil trains in Portland.

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.

Scanned Stop Zenith Petitions File Cover Sheet

Name of File: Stop_Zenith_Petitions_6.pdf

Number of Names in the File: 12

Date Scanned: 9/14/2019

TO: Mayor Ted Wheeler & Portland City Council;

I am deeply concerned about construction activities at the Zenith facility in Portland which may lead to expanded oil train shipments through the Pacific Northwest. Zenith's expansion contradicts the City of Portland's stated opposition to expanded oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland. **We urge the City of Portland to stop issuing permits for expanded tar sands shipments through the City.**

Zenith could be handling up to 2 trains per week, each a mile long, with 100 cars loaded with Tar Sands Crude oil that contains concentrations of flammable and toxic compounds. Many bear the warning "Toxic Inhalation Hazard." Oil trains endanger public safety, public health and environmental risks for communities that live close to rail lines and rely on waterways that could be contaminated from an oil train spill.

We urge you to use your authority to protect Pacific Northwest residents from these risks by halting Zenith Tar Sand expansion in Portland.

Sincerely,

First Name Tamara Last Name Patrick

Address 3910 NE Klickitat

City Portland Zip Code 97212 Email patrickbrown52@comcast.com

Zenith could be handling up to 2 trains per week, each a mile long, with 100 cars loaded with Tar Sands Crude oil that contains concentrations of flammable and toxic compounds. Many bear the warning "Toxic Inhalation Hazard." Oil trains endanger public safety, public health and environmental risks for communities that live close to rail lines and rely on waterways that could be contaminated from an oil train spill.

We urge you to use your authority to protect Pacific Northwest residents from these risks by halting Zenith Tar Sand expansion in Portland.

Sincerely, *Paulette Wittwer*

City Portland Zip Code OR 97212 Email wittwers@Comcast.net

TO: Mayor Ted Wheeler & Portland City Council;

I am deeply concerned about construction activities at the Zenith facility in Portland which may lead to expanded oil train shipments through the Pacific Northwest. Zenith's expansion contradicts the City of Portland's stated opposition to expanded oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland. We urge the City of Portland to stop issuing permits for expanded tar sands shipments through the City.

Scanned Stop Zenith Petitions File Cover Sheet

Name of File: Stop_Zenith_Petitions_7.pdf

Number of Names in the File: 576

Date Scanned: 9/14/2019

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.

Deadline to return: July 1st.

Return Petition by mail or in person to: 350pdx, 1820 NE 21st, Portland OR 97212

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland. **We urge the City of Portland to stop issuing new permits for Tar Sands shipments through our City.**

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and our air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

We urge you to use your authority to protect Pacific Northwest residents from these risks by halting Zenith Tar Sands oil trains in Portland.

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland. **We urge the City of Portland to stop issuing new permits for Tar Sands shipments through our City.**

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and our air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

We urge you to use your authority to protect Pacific Northwest residents from these risks by halting Zenith Tar Sands oil trains in Portland.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.

Scanned Stop Zenith Petitions File Cover Sheet

Name of File: Stop_Zenith_Petitions_8.pdf

Number of Names in the File: 389

Date Scanned: 9/14/2019

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.

Deadline to return: July 1st.

Return Petition by mail or in person to: 350pdx, 1820 NE 21st, Portland OR 97212

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "**Toxic Inhalation Hazard**" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- *Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.*
- *Deny any upcoming permits, appeals, and exemptions for Zenith's facility.*
- *Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.*

Deadline to return: July 1st.

Return Petition by mail or in person to: 350pdx, 1820 NE 21st, Portland OR 97212

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.

Scanned Stop Zenith Petitions File Cover Sheet

Name of File: Stop_Zenith_Petitions_9.pdf

Number of Names in the File: 456

Date Scanned: 9/14/2019

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.

Deadline to return: July 1st.

Return Petition by mail or in person to: 350pdx, 1820 NE 21st, Portland OR 97212

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "**Toxic Inhalation Hazard**" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- *Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.*
- *Deny any upcoming permits, appeals, and exemptions for Zenith's facility.*
- *Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.*

Deadline to return: August 29.

Return Petition by mail or in person to: 350pdx, 1820 NE 21st, Portland OR 97212

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.

Return Petition by mail or in person to: 350pdx, 1820 NE 21st, Portland OR 97212

TO: Mayor Ted Wheeler & Portland City Council:

We are deeply concerned that Zenith Energy's expansion contradicts the City of Portland's stated opposition to increased oil train traffic by adding rail unloading infrastructure that will facilitate more frequent Tar Sands Crude oil shipments through Portland.

Allowing Zenith to handle up to 2 trains per week, each a mile long, with up to 100 cars loaded with Tar Sands Crude oil containing concentrations of flammable, toxic compounds are a threat to public health and the environmental safety of our community. Oil trains transport materials marked with a "Toxic Inhalation Hazard" warning, pose a severe risk to our people, waterways, land and air, all of which will be contaminated in the event of a spill, blast, earthquake or other natural or man-made disaster.

In accordance with the City of Portland's policy of opposing oil trains, and the City's banning of new fossil fuel infrastructure, we urge the City of Portland to...

- Issue an immediate stop work order on Zenith Energy's operations, construction, and expansion. There should be no further work at the Zenith facility until a full health and safety review is conducted and public hearing occurs where representatives from Zenith will meet with Portland residents and local government officials to hear their concerns.
- Deny any upcoming permits, appeals, and exemptions for Zenith's facility.
- Place an immediate moratorium on fossil fuel infrastructure in the City of Portland.
