Foreword from Housing Commissioner Dan Saltzman

Dear Portlanders—

This is the second annual *State of Housing* report by the Portland Housing Bureau. It provides a comprehensive overview of housing affordability and the work of your City government to address issues related to housing affordability.

Within the 2016 report, data indicates that housing affordability in Portland in the last year has gotten worse, an issue that is disproportionately impacting low-income residents, Communities of Color, seniors, and individuals with disabilities. Rents and home prices continue to rise, and housing instability and involuntary displacement are a constant presence for far too many Portlanders.

Despite these challenges, since the publication of our first report 14 months ago, I am encouraged by the accomplishments we have made—prioritizing new policies, resources, and programs to address the housing and homelessness emergency we have in our city today.

I would like to highlight a few of our accomplishments:

- Voter-approval of an Affordable Housing Bond in November, making \$258 million available for affordable rental housing programs over the next 5 to 7 years
- Nearly 1,900 affordable housing units in the production pipeline, with 20% of units dedicated to households earning less than 30% of the area median income
- Lifting of the state preemption on mandatory inclusionary zoning, with a recommended inclusionary housing policy to be presented to City Council for adoption in December of 2016
- Adoption of a commercial and residential construction excise tax to fund affordable rental housing and homeownership programs, estimated at over \$100 million over the next 20 years
- Increasing urban renewal funding dedicated to affordable rental housing and homeownership, estimated to be at least \$67 million over the next 10 years
- Dedication of short-term rental revenue tax to affordable rental housing and homeownership programs, estimated to be at least \$25 million over 20 years
- First-step renter protections providing tenants a 90-day notice for no-cause termination of tenancies and rent increases of 5% or more over a 12-month period
- Establishment of a new Joint Office for Homeless Services
- And, the completed construction and opening of almost 400 new regulated affordable housing rental units

Looking forward, as the City begins the budget development process for the next fiscal year, I have asked the Housing Bureau to focus new budget requests for the development and expansion of services dedicated to tenant protections and landlord-tenant affairs. This is a significant gap in the services we provide our community.

Thank you to staff at the Housing Bureau, in my office, and the community for your continued commitment to addressing affordable housing, homelessness, and tenant protections.

Sincerely,

A handwritten signature in black ink that reads "Dan Saltzman". The signature is written in a cursive, slightly slanted style.

Dan Saltzman
PORTLAND CITY COMMISSIONER

Definition of Terms

ACS. American Community Survey

Affordable Housing. The term “affordable housing”, “affordable rental housing” or “housing affordable to rental households” means that the rent is structured so that the targeted tenant population pays no more than 30 percent of their gross household income for rent and utilities. The targeted tenant populations referred to in this section include households up to 80 percent of area area median income.

American Community Survey. An ongoing Census Bureau survey that collects data on age, race, income, transportation, housing, and other characteristics.

Area Median Income. Area median income for the Portland Metropolitan Statistical Area as defined by HUD as adjusted for inflation and published periodically.

AMI/MHI. Area Median Income / Median Household Income

Area Median Income/Median Household Income. The median divides the income distribution into two equal parts: one-half of the cases falling below the median income and one-half above the median.

Average Asian Household. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as Asian.

Average Black Household. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as African American.

Average Foreign-Born Household. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as being Foreign-Born.

Average Latino Household. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as Hispanic-Latino.

Average Couple with Family. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as being married with children under the age of 18.

Average Native American Household. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as Native American or Alaska Native.

Average Portland Household. A household profile developed using data from the ACS to derive the median household income for a household in Portland.

Average Senior Household. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as over 65 years of age.

Average Single Mother Household. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identifying as a female single head of household with children under the age of 18.

Average White Household. A household profile developed using data from the ACS to derive the median household income for a household with the head of household(s) identify as White Non-Hispanic.

BPS. The City of Portland's Bureau of Planning & Sustainability

CDBG. Community Development Block Grant

Census Tract. Census Tracts are small, relatively permanent statistical subdivisions of a county or equivalent entity that are updated by local participants prior to each decennial census as part of the Census Bureau's Participant Statistical Areas Program.

City Subsidy. Locally controlled public funds administered by the Portland Development Commission, the Portland Housing Bureau, or other City bureau or agency, allocated for the purpose of creating or preserving affordable rental housing to households below 80 percent of area median income. City subsidies may be provided to developers through direct financial assistance such as low interest or deferred loans, grants, equity gap investments, credit enhancements or loan guarantees, or other mechanisms.

City Subsidy Project. Privately owned properties of five or more units which receive a City subsidy after the effective date of Title 30.01 through programs designed to create or preserve rental housing affordable at or below 80 percent of area median income.

Community Development Block Grant. Created under the Housing and Community Development Act of 1974, this program provides grant funds to local and state governments to develop viable urban communities by providing decent housing with a suitable living environment and expanding economic opportunities to assist low- and moderate-income residents. CDBG replaced several categorical grant programs, such as the Model Cities program, the Urban Renewal program, and the Housing Rehabilitation Loan and Grant program.

CoStar. A private real estate research, survey, and data analysis firm.

Decennial Census. The Decennial Census, undertaken by the U.S. Census Bureau, occurs every 10 years, in years ending in zero, to count the population and housing units for the entire United States. Its primary purpose is to provide the population counts that determine how seats in the U.S. House of Representatives are apportioned.

Emergency Shelter. Short-term, temporary assistance that provides overnight stays for adults, youth or families experiencing homelessness—emergency shelters are usually facility-based.

Extremely Low Income. Extremely low-income individuals, households or tenants are those with a gross household income at or below 30 percent of the area median income.

HOME. The Home Investment Partnerships Program provides formula grants to states and localities that communities use—often in partnership with local nonprofit groups—to fund a wide range of activities that build, buy, and/or rehabilitate affordable housing for rent or homeownership, or to provide direct rental assistance to low-income people.

Homeless. People who are living in a place not meant for human habitation, in emergency shelter, in transitional housing, or are exiting an institution where they temporarily resided; people who are losing their primary nighttime residence within 14 days and lack resources or support to remain in housing; families with children or unaccompanied youth who are unstably housed and likely to continue in that state; people who are fleeing or attempting to flee domestic violence, have no other residence, and lack the resources or support networks to obtain other permanent housing; and households who are unsafely and precariously housed.

Housing Stock. The total number of single-family and multi-family housing units.

HUD. The United States Department of Housing & Urban Development

Land Bank. Governmental or nongovernmental nonprofit entity established, at least in part, to assemble, temporarily manage, and dispose of vacant land for the purpose of stabilizing neighborhoods and encouraging re-use or redevelopment of urban property.

LIHTC. Low-Income Housing Tax Credit

Low Income. Low-income individuals, households or tenants are those with a gross household income at or below 50 percent of the area median income.

Low-Income Housing Tax Credit. A tax incentive intended to increase the availability of low-income housing. The program provides an income tax credit to owners of newly constructed or substantially rehabilitated low-income rental housing projects.

Moderate Income. Moderate-income individuals, households or tenants are those with a gross household income at or below 80 percent of the area median income.

Multifamily Unit. Includes rental and ownership units in multi-family buildings.

PDC. The City of Portland's Portland Development Commission

Permanent Supportive Housing. Safe, affordable, community-based housing that provides tenants with the rights of tenancy and links to voluntary and on-going support services, including case management, mental health and substance abuse treatment, disability acquisition, healthcare, employment and job training.

PHB. The City of Portland's Portland Housing Bureau

Preservation. The recapitalization of affordable rental housing to improve, stabilize, and safeguard affordable housing units.

Regulated Affordable Unit. A housing unit with a regulatory agreement tied to the deed that requires affordability for an established income level for a defined period of time.

Rehabilitation. The rehabilitation of an existing building into affordable rental housing.

RMLS. A privately owned real estate database.

Single-Family Unit. Rental and ownership units, including single-family homes, duplexes, townhomes, row homes, and mobile homes.

TIF. Tax Increment Financing

Tax Increment Financing. Revenue generated by issuing various debt instruments which borrow against future growth in property taxes within a designated urban renewal boundary.

Transitional Housing. A housing program that provides a place to stay and supportive services for up to two years to assist individuals and families to move into permanent affordable housing.

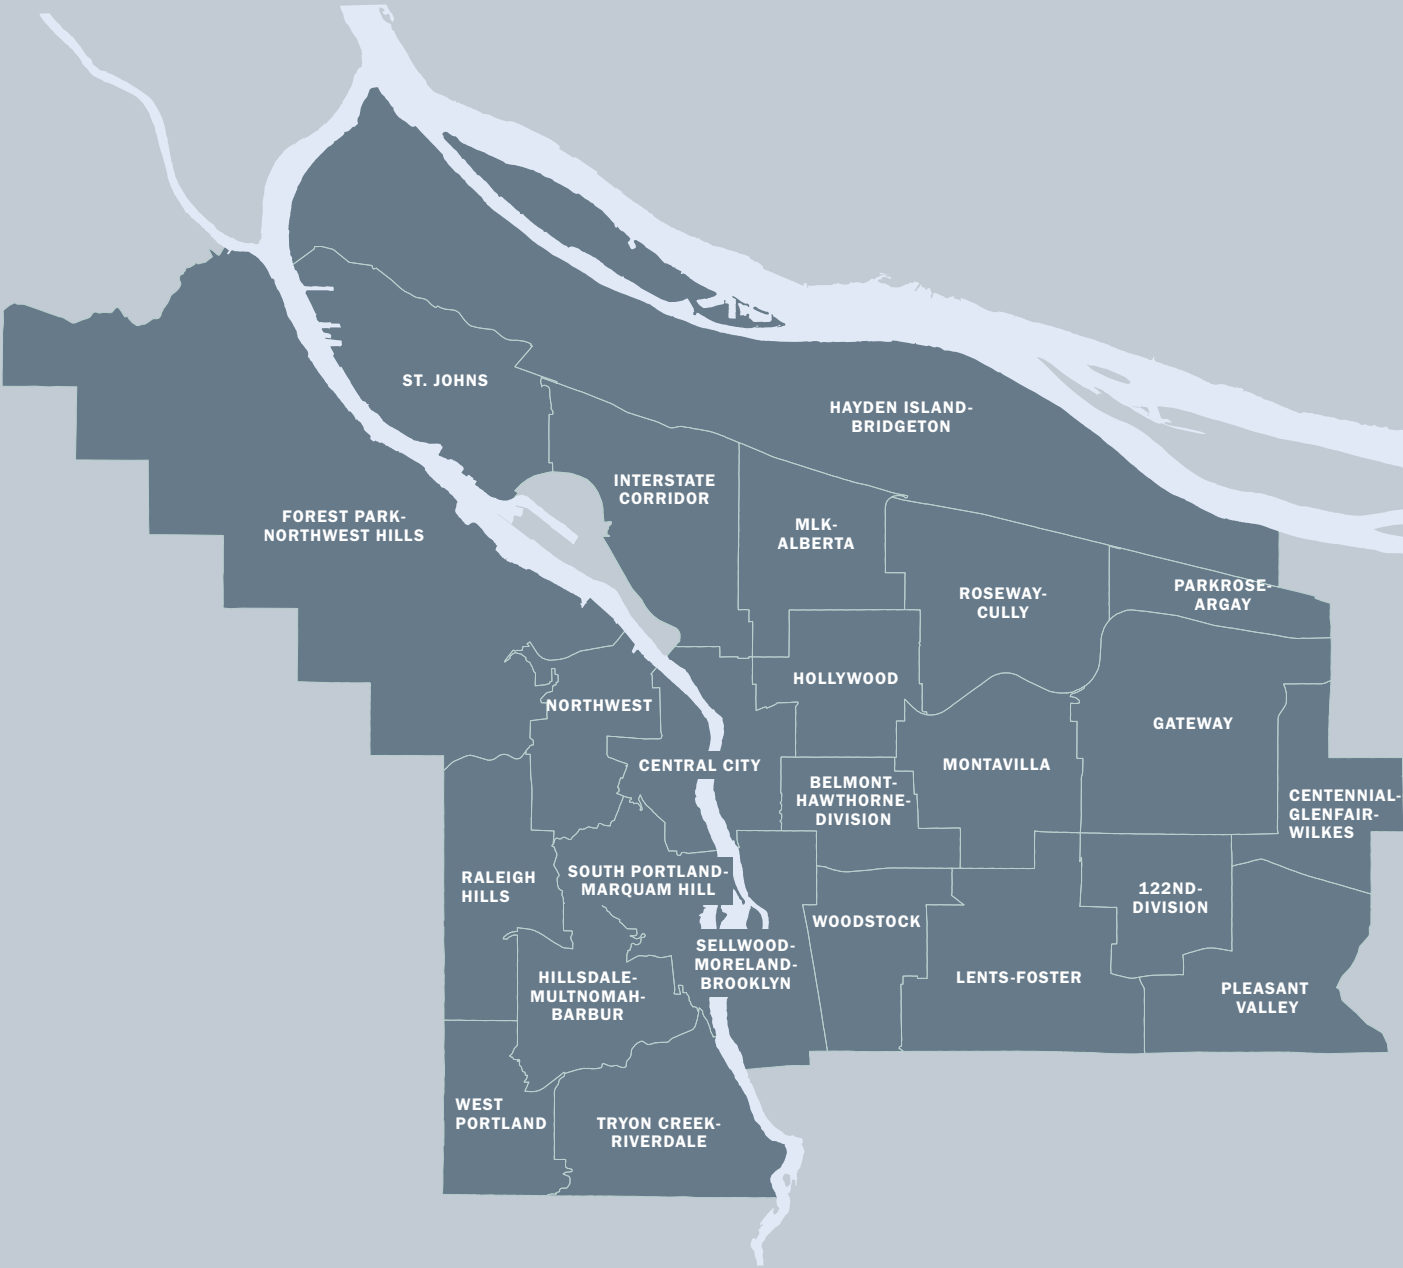

Unit Produced. A housing unit completed and active in the housing stock.

Unit Permitted. A housing unit with a permit for construction issued.

URA. Urban Renewal Area

Urban Renewal Area. An area included in an urban renewal plan under ORS 457.160.

Neighborhood Analysis Areas

Introduction & Context

The *State of Housing in Portland* report is an annual publication that provides stakeholders and policymakers with a comprehensive, real-time look at the state of Portland's housing market by geography, housing type, and the relative affordability to Portlanders based on their income, household composition, race, and ethnicity. The 2016 report shows changes in housing, households, and affordability in the last year, based on the most recently available data.

While this report focuses primarily on the housing market, and the people who interact with that market, it also examines the policies and programs the City of Portland administers in addressing affordable rental and owner housing, tenant protections, and homeless services. In the 14 months since the last report was published, the City has adopted a number of new policies, programs, and revenue sources which will support the creation of thousands of new units of affordable housing for Portlanders.

These initiatives in totality provide valuable context for understanding how the City of Portland is responding to the trends the data in this report illustrate. Outlined below is an overview of the progress made, and the current status of each new initiative.

Voters approve a \$258.4 million affordable housing general obligation bond

In June 2016, City Council referred a measure to Portland voters that would authorize the issuance of \$258 million of general obligation bonds for affordable housing. In November, Portland voters made history by passing Measure 26-179, the City's first affordable housing bond, with 62 percent of the vote. The funding will allow the city to build and preserve an additional 1,300 units of affordable housing for households earning between 0-60 percent of the area median income. It is the largest General Obligation Bond ever passed by Portland voters.

City Council adopts a construction excise tax, dedicating revenue to affordable housing production and preservation

In June 2016, City Council passed a 1 percent Construction Excise Tax on commercial and residential development in Portland to create an additional funding source for affordable housing development at or below 60 percent AMI. Revenue collection from the tax began August 1, 2016, with revenue

estimates of \$8-\$9 million per year.

City Council increases urban renewal resources for affordable housing by \$67 million

Since April 2006, the City of Portland has set aside a portion of the tax increment financing from each of Portland's urban renewal areas to fund the development, preservation, and rehabilitation of affordable housing, as well as community facilities serving homeless and low-income populations.

A scheduled review of the set-aside policy takes place every five years. During the fall 2015 review, City Council voted to increase the percentage of tax increment financing dedicated to affordable housing from an aggregate minimum of 30 percent to 45 percent, increasing the overall funding available for affordable housing by a projected \$67 million through 2024. The increase went into effect retroactively as of July 1, 2015 for all existing and newly formed urban renewal areas—except Airport Way, Willamette Industrial, and Portland Development Commission's Neighborhood Prosperity Initiative Districts.

City Council dedicates short-term rental lodging tax revenue to affordable housing production and preservation

In December 2015, City Council supported a resolution from Commissioner Saltzman to dedicate the revenue collected from lodging taxes on short-term rental companies to affordable housing production and preservation at and below 60 percent AMI. The estimated \$1.2 million in annual revenue will be dedicated to the City's housing investment fund.

City and County create a Joint Office of Homeless Services

In June 2016, City Council voted to approve an Intergovernmental Agreement with Multnomah County to establish a joint office for homeless services comprised of both city and county staff. The new Joint office will maximize efficiency by consolidating policy staff from both agencies under one roof and streamlining efforts to combat homelessness.

Housing Bureau releases \$62 million solicitation for affordable housing proposals

Recognizing the growing housing crisis, in October 2015 the Portland Housing Bureau released \$61.5 million in cash resources and five publicly owned sites for affordable housing development in the bureau's largest solicitation, by more than double, to date. The 2015 Notice of Funding Availability also combined resources from sister agencies, including the Portland Development Commission, Home Forward, and Multnomah County. In addition to the 400 units produced over the last year, the eight awarded projects will add 840 units of affordable housing to City's production pipeline, which now represents nearly 1,900 units, 20 percent of which are targeted to serve the lowest-income households at or below 30 percent AMI.

City Council Declares a Housing and Homelessness Emergency

In October 2015, City Council unanimously approved the declaration of a State of Emergency on Housing and Homelessness. This declaration was adopted to elevate the public awareness of the crisis in affordable housing and homelessness in the city, and provide the City with legal authority to waive certain zoning codes, expedite certain city processes, and prioritize funding and services to address the emergency. Accompanying the declaration of the emergency was a commitment to increase funding for affordable housing and homeless services. In September 2016, City Council extended the emergency declaration for one additional year.

City Council adopts first-step tenant protections

In October 2015, Commissioner Saltzman introduced a proposal for first-step tenant protections before City Council, requiring 90 days before a no-cause termination notices of tenancy, and a 90-day notice for a rent increase greater than 5 percent over a 12-month period. The recommendation was adopted unanimously by City Council and went into effect in

November of 2015.

City and County expand and reform the affordable housing tax exemption program

In 2015, Portland City Council and the Multnomah County Board of Commissioners voted to increase the amount of tax exemption resources available annually for affordable housing production from \$1 million to \$3 million. In addition, Commissioner Saltzman proffered a number of program modifications to increase the utilization of the voluntary program. The program provides a ten-year tax exemption to private developers of multifamily properties in high opportunity areas to provide 20 percent of the housing units at 60 percent or 80 percent AMI for 10 years.

City works with the State Legislature in the removal of mandatory inclusionary housing pre-emption

Working in close coordination with stakeholders, community leaders, and elected officials, the City of Portland identified lifting the pre-emption on inclusionary zoning in state law as its top legislative priority in 2016. On the final day of the 2016 session, the state legislature voted to lift the 17-year pre-emption on the ability of local jurisdictions to implement mandatory inclusionary zoning.

Commissioner Saltzman and the Housing Bureau develop a recommended mandatory inclusionary housing policy for City Council consideration

In December 2016, City Council will consider a proposal from Commissioner Saltzman and the Housing Bureau to implement mandatory inclusionary housing citywide. Under the proposed inclusionary housing policy, developers of multifamily properties with more than 20 units would be required to provide at least 20 percent of units affordable at 80 percent AMI, 10 percent of units affordable at 60 percent AMI, build the affordable units off-site, or pay a fee into an inclusionary housing fund to support the production and preservation of affordable housing. In exchange for the affordable units, developers are being provided a combination of tax exemptions, system development charge waivers, construction excise tax exemptions, density bonuses, and reduced regulations around parking.

Executive Summary

The *2016 State of Housing in Portland* Report shows that housing affordability in Portland has continued to decline in the last year, as rents and home prices continue to climb, outpacing incomes.

The average monthly rent in Portland rose 7 percent between 2015 and 2016, with increases between 12-18 percent in 1, 2, and 3-bedroom units. Studio apartments experienced a comparatively smaller increase of 3 percent.

This is now the fourth consecutive year that Portland has seen an annual rent increase in excess of 5 percent, with the average rent increasing nearly 30 percent since 2012.

Between 2011 and 2015, the median home sales prices citywide rose 44 percent, or by more than \$100,000. As of 2015, the median home sales price exceeded \$400,000 in more than half the neighborhoods in the city. A homebuyer looking to purchase a home below \$300,000 would only have eight neighborhoods to search in, six of which are located in East Portland.

Significant increases in rents and home prices in many East Portland neighborhoods raise serious concerns over potential involuntary economic displacement, as well as housing access and stability. East Portland neighborhoods saw consistent increases in the 10-20 percent range in home sales prices between 2014 and 2015, as well as some of the city's largest rent increases.

Of the 24 neighborhood areas analyzed in this report, the number of neighborhoods with rental affordability for a three-person household at 60 percent of area median incomes declined from six in 2015 to four in 2016. Similarly, four additional neighborhoods have become unaffordable for a three-person moderate-income household at 80 percent of the area median income: Belmont-Hawthorne-Division, MLK-Alberta, Sellwood-Moreland-Brooklyn, and West Portland.

The average Latino household in Portland saw the last neighborhood with rental affordability disappear. They now join the average Black, Native American, and single-mother households, for whom there are no neighborhoods in the city where they can afford to rent. The average senior household saw the number of affordable rental neighborhoods fall from four to just one in 2016.

The picture for homeownership is even bleaker. There are no neighborhoods anywhere in the city currently affordable for the average extremely low-income household, Black household, Latino household, Native American household, senior household, or single-mother household to purchase a home. The average Portland household can only afford to purchase a home in eight of the city's 24 neighborhoods.

While new data indicates that incomes are beginning to rise overall, a closer look reveals a different picture for many Portlanders depending on their race and household type. While homeowners have seen their inflation adjusted median incomes rise to nearly \$80,000 per year, exceeding median income levels in 2000 and 2010, the median income for renters is currently just over \$30,000 and still falls below renter income levels in the year 2000.

A similar trend is mirrored in the income disparities between White households and Communities of Color. While the median income for White households of \$57,000 is higher than inflation adjusted income levels in 2010 and 2000, the median income for Black households, Native American households, and Hawaiian-Pacific households is around \$27,000, and lower than income levels in the year 2000.

With the exception of Asian households, Communities of Color continue to experience disproportionately low homeownership rates when compared to White households or the population as a whole. While White households, and Portland households generally, are roughly 54–57 percent homeowners, African American, Native American, and Hawaiian-Pacific Islander households own homes at rate of roughly 27 percent.

When compared with data from the year 2000, homeownership has declined in 21 of 24 neighborhoods in the city, with rates falling most dramatically in neighborhoods in East Portland.

Portland's overall population, most recently estimated above 612,000, increased by more than 83,000 individuals between 2000 and 2014. Population growth has been concentrated significantly in East Portland, with Gateway, Pleasant Valley,

Centennial-Glenfair-Wilkes, Lents-Foster, and 122nd-Division absorbing close to half of the population increase.

Household growth continues to be heavily concentrated in the Central City and Northwest Portland, which have gained roughly 7,500 new households since 2000. East Portland neighborhoods saw some of the largest gains as well, with Gateway, Lents-Foster, and others gaining more than 2,000 new households each over the same period.

Portland added 4,451 housing units to the housing stock in 2015 (a 1.6 percent increase over the previous year). Multifamily unit production continues to be the bulk of new residential development, representing 84 percent of all new housing units.

Permitting continues to exceed production levels, indicating that the city may continue to see growth in the number of new housing units in 2016 and 2017. More than 4,000 multifamily permits and more than 700 single-family permits were issued in 2015, numbers similar to 2014.

Section 1

Population, Households & Income

Portland's population grew by 83,000 individuals and more than 32,000 households between 2000 and 2014. Population growth has been largely concentrated in East Portland, while much of the household growth has occurred in Northwest Portland and in the Central City. Despite steady growth, disparities in the city's demographic data show troubling trends in inclusiveness, opportunity, and equity among Portlanders.

The median income for renters in Portland is just over \$30,000 per year, less than half of the \$80,000 median income for homeowners. Homeowner incomes have not only recovered from the post-recessionary declines of 2010, they are in fact higher when adjusted for inflation than they were in the year 2000. Meanwhile, renter incomes remain well below the median for renters 14 years ago.

Similar income disparities exist for Communities of Color. The median income for White Portland households is roughly \$57,000, compared to \$27,000 for Black, Native American, and

Hawaiian-Pacific Islander households; \$36,312 for Hispanic-Latino households; and \$53,377 for Asian households.

Communities of Color also continue to experience disproportionately low homeownership rates when compared to White households or the population as a whole. The homeownership rate among White households, and Portland households generally, is 54-57 percent, while African American, Native American, and Hawaiian-Pacific Islander households own homes at a rate of roughly 27 percent.

Population

Portland's population increased by more than 83,000 individuals between 2000 and 2014, with a total estimated population of 612,217 individuals as of 2014.

Five-year estimates from 2014 suggest a decline in the city's African American population. Should this trend hold true over a multiyear period, this data taken together with income and housing and affordability data, is a troubling indicator of inclusiveness and racial equity in housing and opportunity in the city.

Hispanic-Latino communities continue to see the most significant growth, showing a 64 percent increase over a 14-year period.

Overall population growth has been largely concentrated in East Portland, with Gateway, Pleasant Valley, Centennial-Glenfair-Wilkes, Lents-Foster, and 122nd-Division absorbing close to half of the population increase.

The substantial population growth in East Portland, without corresponding household growth in those neighborhoods, suggests that the growth in East Portland consists of larger households.

Change in Population by Neighborhood 2000-2014

Fig. 1.2 Population Growth by Neighborhood, 2000-2014

Source: U.S. Census Bureau – 2000 Decennial Census, 2014 5-Year ACS Estimates

Households

Portland added 32,000 new households between 2000 and 2014. This represents a 14.4% increase in the number of households overall, with significant increases in single-person households (more than 10,700) and foreign-born households (more than 16,700).

Household growth continues to be heavily concentrated in the Central City and Northwest Portland, which gained roughly 7,500 of the new households since 2000. East Portland Neighborhoods saw some of the largest gains as well, with Gateway, Lents-Foster, and others gaining more than 2,000 new households each.

The substantial population growth in East Portland, without corresponding household growth in those neighborhoods, suggests that the growth in East Portland consists of larger households.

Growth in Number of Households by Neighborhood 2000-2014

Income

After adjusting for inflation, updated 2014 estimates continue to show higher median incomes overall than in the year 2010. As of 2014, the median income in Portland was \$53,230.

While data continues to indicate that incomes are generally recovering from losses during the 2008 global recession, disaggregating the data reveals income disparities between homeowners and renters. The median income for Portland homeowners of nearly \$80,000 per year is more than double that of renters, whose median income is just over \$30,000 per year. Moreover, inflation adjusted incomes among Portland homeowners now surpass income levels in 2000, while the median income for renters does not.

Communities of Color also experience significant disparities in median incomes when compared to the population as a whole, or their White counterparts. The median income for White households in Portland is roughly \$57,000, as compared to \$27,000 for Black, Native American, and Hawaiian-Pacific Islander households. Hispanic-Latino households have a median household income of \$36,312, and the median for Asian households is \$53,377.

Homeownership

Updated 2014 estimates for Portland continue to show a lower homeownership rate than in 2000 and 2010—just under half of all households in the city are renter households.

With the exception of Asian households, Communities of Color continue to experience disproportionately low homeownership rates when compared to White households or the population as a whole. While White households, and Portland households generally, own homes at a rate of roughly 54-57 percent, African American, Native American, and Hawaiian-Pacific Islander households own homes at a rate of 27 percent.

Updated data indicates a falling homeownership rate among African Americans and Native Americans when compared to the year 2000—down almost 10 percentage points for Black households as of 2014.

Hispanic-Latino households have seen homeownership rates increase from 30 percent to 37 percent between 2000 and 2014. Despite these gains, however, the homeownership rate among Hispanic-Latino households still falls almost 20 percentage points below White households.

When compared to data from the year 2000, homeownership rates have fallen in 21 of 24 neighborhoods in the city, with the most dramatic declines occurring in East Portland.

Change in Homeownership Rate by Neighborhood 2014

Racial Diversity

Changes in the proportion of the non-White population measured in the 24 neighborhood areas between 2000 and 2014 illustrate a continued significant shift in the racial composition of the city.

Communities of Color are increasingly located in Outer East and Southeast Portland. North and Northeast Portland have experienced significant declines in the proportion of the population that consists of Communities of Color since the year 2000.

MLK-Alberta and Interstate Corridor are the only Portland neighborhoods where the proportion of the population that is from Communities of Color declined in the period between 2000 and 2014.

Almost every East Portland neighborhood experienced double-digit increases in the proportion of the population that is from Communities of Color.

Change in Racial Diversity by Neighborhood 2000-2014

Homelessness

The Point-In-Time Count of Homelessness occurs every two years, and new data will not be available until the 2017 State of Housing in Portland report.

In 2015, 2,759 people were homeless at a point-in-time in Portland and Multnomah County, a rate of 35.89 per 10,000 people in the general population. The Point-In-Time Count is a tally of sheltered and unsheltered homeless persons on a single night in January. HUD requires that communities conduct an annual count of homeless persons in emergency shelter or transitional housing (time-limited housing with services for people exiting homelessness). Communities must also conduct a count of unsheltered homeless person every other year (odd numbered years). Each count is planned coordinated and carried out locally.

People of Color are over-represented with the homeless population compared with the general population of Portland and Multnomah County. The extent of the over-representation varies by community. All Communities of Color except Asians are over-represented, with the greatest levels of over-representation occurring among Native American and Black populations.

Section 2

Housing Stock & Production

Portland has experienced two years of strong housing production and permitting, with annual production and permitting levels higher than at any point in the last fifteen years.

Permitting continues to exceed production levels, offering an indicator that the city may continue to see growth in the number of new housing units added to the city stock in 2016 and 2017. Over 4,000 multifamily permits, and over 700 single family permits were issued in 2015, numbers similar to final figures from the 2014 calendar year. In total, over 10,000 permits were issued in 2014 and 2015, with close to 9,000 new housing units added to the total city housing stock.

Roughly half of new multifamily development continues to be focused in the Central City, with neighborhoods surrounding the city's core consuming the balance of multifamily development. Single-family development is spread fairly evenly throughout the city, although MLK Alberta, Lent-Foster, and Interstate Corridor neighborhoods accounted for one-third of the single family units permitted and produced in 2015.

Production Totals

Portland added 4,451 housing units to the housing stock in 2015, an increase in total housing units of 1.6%. Multifamily unit production continues to be the bulk of new residential development, with 84% of all new housing units falling within the multifamily category. In total, the composition of the housing stock consists of 277,667 housing units, with 154,959 single-family and 122,708 multifamily homes.

Housing unit production in 2014 and 2015 totaled close to 9,000 new units added to the total city housing stock. This two-year production level exceeds the total of all production combined from the 5 years prior to 2014.

Production Totals, cont.

Multifamily

With updated data in the 2016 report, multifamily production and permitting in 2014 and 2015 now exceeds pre-recessionary levels of development. In both years, over 4,000 multifamily permits were issued per year, for a total of 8,778 permits. Over the same time period, 7,515 multifamily units were added to the housing stock—roughly 3,700 per year.

Single-Family

Portland has continued to see an increase in the number of single-family housing units added to the housing stock, in the post-recessionary housing market. The production of new units climbed from 686 in 2014, to 723 in 2015. Despite this increased production, these numbers still continue to fall below pre-recessionary levels. Permitting between 2013 and 2015 has stayed around 800 per year, with permits falling in 2015 over the previous year.

Production by Neighborhood

Multifamily

3,728 multifamily units of housing were added to the housing stock in Portland in 2015—just under half of the units, 47%, were added in the Central City. South Portland-Marquam Hill increased the number of multifamily units in their neighborhood by nearly 13%, with the addition of 653 units. The Hayden Island-Bridgeton, Northwest, Belmont-Hawthorne-Division, Interstate Corridor, and Gateway neighborhoods each added between 100-300 multifamily units.

In 2015, the City of Portland issued over 4,500 permits for multifamily units throughout the city. Multifamily permitting continues to be concentrated in the Central City and the surrounding neighborhoods of Northwest, South Portland-Marquam Hill, Belmont-Hawthorne-Division, Sellwood-Moreland-Brooklyn, and Interstate Corridor. The multifamily permits in these neighborhoods accounted for 93% of all multifamily permits, or over 4,200 units. The number of multifamily permits issued in the South Portland-Marquam Hill, Interstate Corridor, and Belmont-Hawthorne-Division neighborhoods roughly doubled in each neighborhood between 2014 and 2015.

Multifamily Permitting 2015

Production by Neighborhood, cont.

Single-Family

723 single-family housing units were added to the housing stock in Portland in 2015. While the production of units was spread evenly across neighborhoods, MLK Alberta, Lents-Foster, and Interstate Corridor accounted for 35% of production with 78 to 99 single-family units added in each area. It is likely this trend will continue, as 38% of single-family permits issued in 2015 were in these three neighborhoods.

In total, 847 single-family housing units were permitted by the City of Portland in 2015. Similar to the 2015 production data, single-family unit permits issuances continue to be spread somewhat evenly across neighborhoods.

Household Profile

A household type to show how rental affordability varies among different populations in Portland.

Household Data

Currently available data for each household type.

Data Source: ACS 2014 5-Year Estimates

Affordability Estimates

Average Q3 rent for 2015 and 2016, and estimates of the affordability of multifamily rental units for each neighborhood by unit type. Affordability was determined according to whether or not the average rent for a type of unit in a neighborhood exceeded 30% of the median income for the given household type (not including utilities).

Data Source: ACS 2014 5-Year Income Estimates and Costar 2016 Multifamily Residential Market Survey Data

Change in Rental Prices 2015 to 2016

In 2016, Portland rents continued to increase at an average rate of 7% over the previous year—or roughly \$75 per month. The largest rent increases, 12-18%, were in rental units with 1, 2, or 3 bedrooms, while studio apartments experienced a comparatively smaller increase at 3%. This marks the 4th year in a row that Portland has experienced rent increases in excess of 5% per year, with the average rent in Portland increasing nearly 30% since 2012.

While studio apartments have seen rental prices flatten or fall in the Central City and Inner East Portland, Southwest Portland and Outer Southeast Portland have experienced double digit increases with studio rents between 15-60% higher than in 2015.

Rents for 1, 2, and 3-bedroom apartments have increased in every neighborhood in the city. With the exception of the St. John's and Hillsdale-Multnomah-Barbur neighborhoods, a Portland renter looking for a 1-bedroom apartment with an average rent below \$1,000 per month will likely need to look east of 60th avenue.

In a trend similar to 2015, some of the largest rent increases continue to occur in neighborhoods in East Portland. This highlights continued concerns of increased housing instability and cost burden in the most affordable areas of the city. Additionally, large rent increases in neighborhoods in Southwest and North Portland in both 2015 and 2016 raise concerns over potential involuntary economic displacement.

Household Profile

A household type to show how homeownership affordability varies among different populations in Portland.

Household Data

Currently available data for each household type.

Data Source: ACS 2014 5-Year Estimates

Affordability Estimates

Median home sales price and estimates of homeownership affordability by neighborhood. Monthly cost estimates include mortgage and insurance costs only. Affordability was determined according to whether or not the homeownership cost exceeded 30% of the median income for the given household type, not including taxes or utilities.

Data Source: ACS 2014 5-Year Income Estimates, PHB, and RMLS 2016

Change in Home Sales Price 2011 to 2015

As of 2015, the median homes sales price in Portland exceeded \$400,000 in over half the neighborhoods in the city. A home buyer looking to purchase a home in a neighborhood with a median price below \$300,000 would only have 8 neighborhoods to search in, 6 located in East Portland.

Between 2011 and 2015, the median home sales price citywide increased by 44%, or over \$100,000. Similar to the 2015 report, the Lents-Foster neighborhood has continued to see the most significant increase in median homes sales price, increasing nearly 80% between 2011 and 2015.

Hayden Island experienced the largest increase in median home sales price between 2014 and 2015, increasing 42%, or nearly \$80,000. Following Hayden Island, the neighborhoods with the highest price increases between 2014 and 2015 include Gateway, Interstate Corridor, Woodstock, and Centennial-Glenfair-Wilks, with price increases between 17-19%.

East Portland neighborhoods have seen consistent price increases in the 10-20% range between 2014 and 2015. Similar to increases in the rental market, these trends raise concerns about the ability of homebuyers to transition to homeownership and increase their housing stability.

Portland Homeownership Affordability: Change in Median Home Sales Price, 2011 to 2015

Neighborhood	2015 Median Home Sales Price	% +/-
Portland	\$339,000	+44.1%

Neighborhood

Area of the city being profiled in the data summary.

Population and Income

Neighborhood population, median household income, and poverty rate by race and ethnicity in the years 2000 and 2014.

Neighborhood households (all, single and with children), foreign-born individuals, persons experiencing disabilities, and seniors in the years 2000 and 2014.

Housing Stock and Production

Neighborhood housing stock disaggregated into single-family and multifamily units, regulated affordable housing units, and production values through single-family and multifamily permitting data in the years 2000, and 2010 to 2015.

Housing Market and Affordability

Estimates of the rental affordability of multifamily rental units in Portland neighborhoods by unit type. Average rent and vacancy rate data assessed through market survey analysis. Affordability assessed through a comparison test on whether the average rent exceeded 30% of that household's median income.

Estimates of the homeownership affordability in Portland neighborhoods. Median home sales prices assessed through RMLS. Monthly homeownership cost estimates based on mortgage and insurance cost. Affordability assessed through a comparison test on whether the homeownership cost exceeded 30% of that household's median income.

Guide to Citywide Policy Targets

Policy Targets
2035 Comprehensive Plan

Geography Citywide
Year Established 2016
Year Complete 2035
Plan Version Comprehensive Plan;
Adopted 2016
Ordinance No. 187832

Target
NOT MEETING
Allow and support a robust and diverse supply of affordable, accessible housing to meet the needs of older adults and people with disabilities, especially in centers, station areas, and other places that are proximate to services and transit.

Target
NOT MEETING
Enhance renter health, safety, and stability through education, expansion of enhanced inspections, and support of regulations and incentives that protect tenants and prevent involuntary displacement.

Target
NOT MEETING
Remove potential regulatory barriers to housing choice for people in protected classes to ensure freedom of choice in housing type, tenure, and location.

Target
NOT MEETING
Evaluate plans and investments, significant new infrastructure, and significant new development for the potential to increase housing costs for, or cause displacement of communities of color, low and moderate income households, and renters. Identify and implement strategies to mitigate the anticipated impacts.

Target
NOT MEETING
When plans and investments are expected to create neighborhood change, limit the involuntary displacement of those who are under served and under represented. Use public investments and programs, and coordinate with nonprofit housing organizations (such as land trusts and housing providers) to create permanently affordable housing and to mitigate the impacts of market pressures that cause involuntary displacement.

City Plan

A City of Portland planning/policy document that establishes affordable housing policy targets, and the associated geographic area.

Policy Targets

Defined and measurable affordable housing goals established within the document, as well as the timeframe, current status, and progress toward reaching the goal.

2035 Comprehensive Plan

Geography Citywide
Year Established 2016
Year Complete 2035
Plan Version *Comprehensive Plan;
Adopted 2016
Ordinance No. 187832*

Target

**NOT
MEETING**

Allow and support a robust and diverse supply of affordable, accessible housing to meet the needs of older adults and people with disabilities, especially in centers, station areas, and other places that are proximate to services and transit.

Target

**NOT
MEETING**

Enhance renter health, safety, and stability through education, expansion of enhanced inspections, and support of regulations and incentives that protect tenants and prevent involuntary displacement.

Target

**NOT
MEETING**

Remove potential regulatory barriers to housing choice for people in protected classes to ensure freedom of choice in housing type, tenure, and location.

Target

**NOT
MEETING**

Evaluate plans and investments, significant new infrastructure, and significant new development for the potential to increase housing costs for, or cause displacement of communities of color, low and moderate income households, and renters. Identify and implement strategies to mitigate the anticipated impacts.

Target

**NOT
MEETING**

When plans and investments are expected to create neighborhood change, limit the involuntary displacement of those who are under served and under represented. Use public investments and programs, and coordinate with nonprofit housing organizations (such as land trusts and housing providers) to create permanently affordable housing and to mitigate the impacts of market pressures that cause involuntary displacement.

2035 Comprehensive Plan cont.

Target

Support and coordinate with community organizations to hold land in reserve for affordable housing, as an anti displacement tool, and for other community development purposes.

MEETING

Target

Locate new affordable housing in areas that have high/medium levels of opportunity in terms of access to active transportation, jobs, open spaces, high quality schools, and supportive services and amenities.

MEETING

Target

Strive to produce and fund at least 10,000 new regulated affordable housing units citywide by 2035 that will be affordable to households in the 0-80 percent AMI bracket.

**NOT
MEETING**

Target

Encourage development or financial or regulatory mechanisms to achieve the regulated affordable housing target set forth for 2035.

**NOT
MEETING**

Target

Use inclusionary zoning and other regulatory tools to effectively link the production of affordable housing to the production of market rate housing. Work to remove regulatory barriers that prevent the use of such tools.

**NOT
MEETING**

Target

Prevent homelessness and reduce the time spent being homeless by allowing and striving to provide a continuum of safe and affordable housing opportunities and related supportive services including but not limited to rent assistance, permanent supportive housing, transitional housing, micro housing communities, emergency shelters, temporary shelters such as warming centers, and transitional campgrounds/rest areas.

**NOT
MEETING**

Central City Policy Targets

Guide to Central City Policy Targets

Policy Targets

Central City 2035: Concept

Geography	Central City
Year Established	2012
Year Complete	2035
Plan Version	Central City 2035 Concept Plan October 2012 Resolution No. 36970

Target → Preserve and add to the existing affordable housing supply of the Central City to maintain and grow the racial, ethnic and economic diversity of the Central City.

MEETING

In 2012 the City maintained 5,877 units of regulated affordable housing in the Central City. This number has increased to 7,100 in 2015.

Target → Continue to develop new affordable housing in the Central City so that approximately 30% of the total housing in the Central City is affordable to households between 0% and 80% MFI.

MEETING

The City currently maintains 7,100 regulated affordable units below 80% MFI in the Central City and a market survey estimates 2,100 market rate units below 80% MFI for a total of 9,200 or 36% of the total housing in the Central City.

Target → Increase the supply of housing affordable to working households in the 50% to 80% MFI bracket, households for whom the Central City's access to jobs and transit can be particularly beneficial.

MEETING

The City currently maintains tax exemption programs to incentivize the development of regulated affordable rental housing up to 80% MFI and provide financing to incentivize the development of regulated affordable rental housing up to 60% MFI.

Target → For public affordable housing resources, prioritize funding for housing programs and investment to meet the unmet needs of extremely low and very low-income households (0-50% MFI).

MEETING

The City currently targets its financial resources for affordable rental housing at households earning up to 60% MFI.

Central City Plan

A City of Portland planning/policy document that establishes affordable housing policy targets, and the associated geographic area.

Policy Targets

Defined and measurable affordable housing goals established within the document, as well as the timeframe, current status, and progress toward reaching the goal.

Central City 2035: Concept

Geography Central City
Year Established 2012
Year Complete 2035
Plan Version *Central City 2035 Concept Plan*
October 2012
Resolution No. 36970

Target Preserve and add to the existing affordable housing supply of the Central City to maintain and grow the racial, ethnic and economic diversity of the Central City.

MEETING

In 2012 the City maintained 5,877 units of regulated affordable housing in the Central City. This number has increased to 7,978 in 2015.

Target Continue to develop new affordable housing in the Central City so that approximately 30% of the total housing in the Central City is affordable to households between 0% and 80% AMI.

MEETING

The City currently maintains 7,100 regulated affordable units below 80% AMI in the Central City and a market survey estimates 2,156 market rate units below 80% AMI for a total of 9,200 or 36% of the total housing in the Central City.

Target Increase the supply of housing affordable to working households in the 50% to 80% AMI bracket, households for whom the Central City's access to jobs and transit can be particularly beneficial.

MEETING

The City currently maintains tax exemption programs to incentivize the development of regulated affordable rental housing up to 80% AMI and provide financing to incentivize the development of regulated affordable rental housing up to 60% AMI.

Target For public affordable housing resources, prioritize funding for housing programs and investment to meet the unmet needs of extremely low and very low-income households (0-50% AMI).

MEETING

The City currently targets its financial resources for affordable rental housing at households earning up to 60% AMI.

Central City 2035: Concept cont.

Target

Provide housing and services that directly assist at-risk populations and allow people to transition to more stable living conditions.

MEETING

The City currently provides housing assistance, transitional housing, and shelter housing to between 13,000 and 14,000 individuals each year.

Target

NOT MEETING

Align plans, investments and other policy tools to support improving homeownership rates and location choice for people of color and other groups who have been historically under-served and under-represented in the Central City.

The City does not currently administer homeownership programming in the Central City.

Target

MEETING

Develop a diversity of housing types compatible with the needs of families with children, students, seniors and special needs residents.

The City currently funds a variety of affordable housing projects in response to various needs throughout the community.

Target

MEETING

Incent increased participation of private sector in participating in strategies to increase supply of workforce, student and senior housing in and near Central City.

The City currently administers tax and fee exemption programs, as well as gap financing programs, to incentivize affordable housing in and near Central City.

Year Established 2015
Year Complete 2035
Plan Version *Central City 2035 SE Quadrant Plan,
July 2015
Resolution No. 37147*

Target Update the Central City Housing Inventory by 2016 and conduct periodic updates on a regular basis.

MEETING *The City now reports on the housing stock, production, and affordability on an annual basis.*

Target Pursue opportunities for affordable housing and well as mixed-income housing projects within the Clinton Station area, with a focus on lands currently owned by the City of Portland.

NOT MEETING *Affordable housing programming within the Clinton Station area is not yet under development.*

Target Develop a sustainable source(s) of funding to create and preserve affordable housing throughout the Central City that aligns with geographic scope and time horizon of the City's affordable housing goals.

NOT MEETING *Existing resource forecasts and regulatory mechanisms are insufficient to meet City production target.*

Year Established 2015
Year Complete 2035
Plan Version Central City 2035 West Quadrant Plan
March 2015
Resolution No. 37115

- Target**
NOT MEETING
Develop and implement an affordable housing strategy for the West End that preserves or replaces existing affordable housing, including buildings that are privately owned.
West End affordable housing preservation strategy not yet developed.
- Target**
NOT MEETING
Restructure FAR bonus system to increase affordable housing production including family friendly units.
Voluntary inclusionary zoning programs are under development.
- Target**
MEETING
Create incentives and programs to increase affordable housing that supports families.
The City currently uses gap financing and tax and fee exemption programs to incentivize family supported regulated affordable housing development.
- Target**
MEETING
Provide a housing tax abatement program for Old Town/China Town.
The City currently maintains a tax exemption program that can be utilized in Old Town/China Town.
- Target**
MEETING
Implement incentives that encourage new housing in the Naito Parkway/riverfront area.
The City expanded the capacity and modified requirements of the Multiple Unit Limited Tax Exemption program (MULTE) to increase participation by private developers. All properties along the Naito Parkway/riverfront area are within the MULTE eligible boundary.

Year Established 2012
Year Complete 2035
Plan Version *Central City 2035 N/NE Quadrant Plan
October 2012
Resolution No. 36972*

- Target**
NOT MEETING
Develop regulatory tools to encourage housing development and the inclusion of affordable housing.
Mandatory inclusionary zoning programs are under development.
- Target**
MEETING
Develop affordable rental housing through investment of TIF Set Aside funds and other programs.
Tax Increment Financing Set-Aside for Affordable Housing Policy dedicates, at a minimum, 45% of all increment funds to affordable housing.
- Target**
NOT MEETING
Support connections between district employers and employee housing within the district through employer-assisted housing programs and coordinated mixed-use development, particularly employer-assisted housing for service level workers employed within the district.
The City does not currently administer employer-assisted housing programming.

Plan Version City Council Resolution 36021

Target

NOT MEETING

The City of Portland will maintain no less than 8,286 rental housing units affordable to households who earn from 0-60% of the area median income within Central City.

When adopted in 2002, the City estimated 8,286 rental units in the Central City were affordable to households earning less than 60% of the area median income. A recent survey identified 7,937 rent-regulated units and 156 market-rate units affordable at 60% AMI. While the number of regulated affordable units has increased by 2,547 units since 2002, the Central City has seen continued loss of affordability in market-rate units. The majority of affordable units in both regulated and market-rate properties are smaller units serving one- and two-person households. Family-sized affordable units are limited.

No Net Loss Rental Housing Units, 0-60% AMI	Regulated Units		Market Units		Total Units

Urban Renewal Area Housing Plan

A City of Portland planning/policy document that establishes affordable housing policy targets, and the associated geographic area.

Policy Targets

Defined and measurable affordable housing goals established within the document, as well as the timeframe, current status, and progress toward reaching the goal.

Housing Stock & Production

Urban Renewal Area housing stock by unit type, and City regulated affordable housing units and production values for the years 2000, and 2010–2014. All regulated unit counts listed for the Urban Renewal Areas refer only to units in the City of Portland’s portfolio and pipeline.

Target

MEETING

The City will dedicate an aggregate citywide minimum of 40% of all tax increment financing within urban renewal areas, with the exception of Airport Way and Willamette Industrial, to the development, reservation and rehabilitation of affordable housing from 2006 through the lifetime of the district.

As of the 2016-17 City fiscal year the city aggregate set-aside level is 40%.

Target

MEETING

The City will dedicate, at a minimum, an average of 22% of all tax increment financing within the Central Eastside Urban Renewal Area to the development, reservation and rehabilitation of affordable housing from 2006 through the lifetime of the district.

As of the 2016-17 City fiscal year the city aggregate set-aside level is 22%.

Target

MEETING

The City will dedicate, at a minimum, an average of 21% of all tax increment financing within the Downtown Waterfront Urban Renewal Area to the development, preservation and rehabilitation of affordable housing from 2006 through the lifetime of the district.

As of the 2015-16 City fiscal year the district aggregate set-aside level is 21%.

Target

MEETING

The City will dedicate, at a minimum, an average of 33% of all tax increment financing within the Gateway Regional Center Urban Renewal Area to the development, reservation and rehabilitation of affordable housing from 2006 through the lifetime of the district.

As of the 2016-17 City fiscal year the city aggregate set-aside level is 33%.

Target

MEETING

The City will dedicate, at a minimum, an average of 55% of all tax increment financing within the Interstate Corridor Urban Renewal Area to the development, reservation and rehabilitation of affordable housing from 2006 through the lifetime of the district.

As of the 2016-17 City fiscal year the city aggregate set-aside level is 55%.

Affordable Housing Set-Aside cont.

Target

MEETING

The City will dedicate, at a minimum, an average of 38% of all tax increment financing within the Lents Town Center Urban Renewal Area to the development, reservation and rehabilitation of affordable housing from 2006 through the lifetime of the district.

As of the 2016-17 City fiscal year the city aggregate set-aside level is 38%.

Target

MEETING

The City will dedicate, at a minimum, an average of 44% of all tax increment financing within the North Macadam Urban Renewal Area to the development, reservation and rehabilitation of affordable housing from 2006 through the lifetime of the district.

As of the 2016-17 City fiscal year the city aggregate set-aside level is 44%.

Target

MEETING

The City will dedicate, at a minimum, an average of 26% of all tax increment financing within the Oregon Convention Center Urban Renewal Area to the development, preservation and rehabilitation of affordable housing from 2006 through the lifetime of the district.

As of the 2015-16 City fiscal year the district aggregate set-aside level is 26%.

Target

MEETING

The City will dedicate, at a minimum, an average of 36% of all tax increment financing within the River District Urban Renewal Area to the development, reservation and rehabilitation of affordable housing from 2006 through the lifetime of the district.

As of the 2016-17 City fiscal year the city aggregate set-aside level is 36%.

Target

MEETING

The City will dedicate, at a minimum, an average of 61% of all tax increment financing within the South Park Blocks Urban Renewal Area to the development, reservation and rehabilitation of affordable housing from 2006 through the lifetime of the district.

As of the 2016-17 City fiscal year the city aggregate set-aside level is 61%.

Rental Housing

Guide to Rental Housing

Asset Portfolio

All rental units with affordability regulated by the City of Portland (ie: where the City has an affordability regulatory agreement in place with the property owner). These rental units have received some form of financial, tax, or regulatory subsidy from the City of Portland and in return are required to maintain a level of affordability that is linked to area median income levels. The length of time that units must remain affordable under the conditions of the agreement varies based on the type of subsidy received.

City Regulated Affordable Rental Units

The number of affordable rental units regulated by the City of Portland in total and at each level of affordability. Levels of affordability reflect the income levels at which the unit rents are capped (30%, 40%, 50%, 60%, or 80% of the area median income).

Financing

The City of Portland offers many forms of financial, tax, or regulatory subsidy (federal and local) to private and nonprofit organizations for the development of regulated affordable housing. This data disaggregates the number of regulated affordable units that were developed based on the combination of subsidies received.

Asset Portfolio

New Construction

The City invests primarily in the construction of new multifamily housing to increase the supply of affordable rental units. Sixty-six percent of the projects in the City's asset portfolio are new construction projects.

City Regulated Rental Units by Financing Structure*	30% AMI	40% AMI	50% AMI	60% AMI	80% AMI	Total

AMI=Area Median Income

All Buildings

The City of Portland increases the availability of affordable rental housing primarily through capital investments in the construction of new residential buildings or to help acquire and rehabilitate existing buildings (“preservation”). Rents in City-subsidized units are generally restricted to serve households at or below 60 percent of the area median income (currently \$43,980 for a family of four). Partnering agencies—usually nonprofit community development corporations who own and operate the buildings—agree to maintain the affordability of housing subsidized with a loan from the City for a minimum of 60 years.

The largest share of the City’s resources for investment in affordable housing comes from local tax increment financing (TIF), which is restricted to use within the urban renewal areas (URAs). The City also invests federal resources, including the Community Development Block Grant (CDBG) and HOME funds, which can be used for development city-wide.

The other way the City contributes to the supply of affordable rental housing is through property tax and development fee exemptions (“indirect funding”) to for-profit developers who agree to offer affordable units within otherwise market-rate projects. Tax exemption projects restrict rents in a portion of new units at 60 or 80 percent of the area median income, depending on their location.

Whether a project receives direct or indirect funding, the City monitors compliance with affordability restrictions on all units annually for the life of the regulatory agreement.

In accordance with the N/NE Neighborhood Housing Strategy, the King Parks Apartments will provide 70 new units of affordable housing for households that have been displaced from North and Northeast Portland—or longtime residents of the area who are at risk of displacement now. Project sponsor PCRI plans to conduct tenant outreach in partnership with community-serving organizations, including Self-Enhancement, Inc., the Urban League of Portland, and Portland African American Leadership Forum.

The planned mix of unit sizes will serve individuals, families, and seniors earning up to 60 percent of the area median income (currently less than \$36,650 annually for a family of four).

The design features two buildings with a secured shared courtyard area. A four-story building fronting Martin Luther King Jr. Blvd will include a laundry room on each floor, a community space, and offices. Across the courtyard, a two-story building will feature three-bedroom townhouses.

With twenty-eight parking spaces, secure bike parking, and its close proximity to mass transit options, the King Parks Apartments will accommodate households who rely on a variety of transportation methods.

Preservation

Renovating and retrofitting affordable rental properties provides safer and more sustainable homes for low-income households, and preserves the affordability of renovated units by placing a regulatory agreement on properties that might otherwise be susceptible to market pressures. Preservation projects account for forty-four percent of the City's portfolio.

The renovation and rehabilitation of two Home Forward projects—Gladstone Square and Multnomah Manor—will preserve 101 units of affordable housing, and improve water infiltration issues and failing water supply lines for the low- and moderate-income families that currently call them home.

Originally constructed in 1997, Gladstone Square currently provides 48 units of affordable housing to very-low income families earning 30-60 percent of the area median income (\$24,300–\$43,980 for a family of four). The significantly older Multnomah Manor, built in 1969, provides 54 units of affordable housing to low- and moderate-income families earning 50-80 percent of the area median income (\$36,650–\$58,650 for a family of four). The planned rehabilitation will repair water infiltration at Gladstone Square and replace water supply lines at Multnomah Manor. By combining the City’s investment with private investment through the use of Low Income Housing Tax Credits, Home Forward will be able to ensure the affordability of this housing for an additional 20 years.

0-30% AMI

Sixteen percent City-regulated units are targeted to serve the lowest-income households, including those exiting or at risk of homelessness. In order to provide units with rents restricted at or below 30 percent of area median income (currently \$22,000 a year for a family of four), greater levels of subsidy are needed to cover a project’s operating costs. Leveraging other sources of funding such as federal Low-Income Housing Tax Credits and rent assistance through Project Based Section 8 and Veterans Affairs Supportive Housing (VASH) vouchers, often help projects achieve deeper affordability.

This 61-unit apartment community planned for Multnomah County property in North Portland will leverage 40 Project-Based Section 8 vouchers from Home Forward to serve very low- and low-income families, with priority given to longtime and displaced residents of the North and Northeast Portland.

When completed, the four-story N. Williams Center will form a “U” shape around a landscaped courtyard. Other site features include community gardens, a children’s area, a chicken coop, and gathering spaces for residents. Stacked units and surface lot parking contribute to a highly efficient building design.

BRIDGE Housing Corporation intends to retain the nonprofit service organization Albertina Kerr, a current site occupant, to continue providing art and garden programs for the developmentally disabled and expand programming to residents. Up to 10 units may be reserved for income-qualifying families with a developmentally disabled member of their household. In addition, BRIDGE will layer in supportive services intended to increase the financial security of residents and help them maintain successful tenancies. A community focus combined with supportive services is consistent with the stated community priorities captured in the N/NE Neighborhood Housing Strategy.

Mixed Income

Buildings that offer housing units at a range of income levels serve neighborhoods and communities by helping to mitigate residential segregation and concentrated pockets of poverty. For building owners, the mix of income levels can help off-set the lower rents charged for units regulated at 60 percent of area median income and below.

This mixed-income, mixed-use development planned for a City-owned site near the Oregon Convention Center will provide new housing opportunities for a broad diversity of Portlanders. The 204-unit development will include 140 units of affordable housing, some of which will be reserved for vulnerable populations, including chronically homeless persons and survivors of domestic violence.

In partnership with Multnomah County Domestic Violence Coordination Office, the Gateway Center, and other agencies, the Domestic Violence Coordinated Access housing system will offer housing placement and retention support. Residents will also be able to receive self-sufficiency training, credit repair, job placement, employment referrals, and home-buying education through Home Forward’s GOALS program.

Site features will include ground-level retail space fronting the MAX line, above-ground retail parking, bike storage, and a rooftop terrace or garden space for residents.

Section 2

Homeownership

Guide to Homeownership

Loan Portfolio

Homeownership

Through programs and investments focused on increasing access to homeownership and retention of owned homes, the City of Portland helps low- and moderate-income households realize the many benefits of owning a home. Since 2010, the City has issued down payment assistance loans for first-time homebuyers and home repair loans to support existing homeowners struggling to manage the costs of maintaining a home. These loans generally require no payments and accrue no interest, in order to maximize financial stability for low-income households.

The City also funds education and counseling programs to create mortgage-ready households, support first-time homebuyers, and prevent foreclosure, as well grants to improve the health and livability of owned homes. These programs are administered through community-serving organizations to reach underserved populations.

The City also directly administers several federal and local programs to promote homeownership and increase the supply of affordable homes. These include the Mortgage Credit Certificate (MCC) program, which increases the buying power of first-time homebuyers by reducing their federal income tax obligation, as well as System Development Charge (SDC) and property tax exemptions to incentivize the development of new affordable ownership homes.

AMI=Area Median Income

Loan Portfolio

All current single-family homeownership and home repair loans issued by the City of Portland (documented by an affordability covenant or lien on individual properties) to individual households to support homeownership access or retention. The terms of the loan vary based on the instrument used.

Homeownership Loans by Financing Instrument

The number of loans within the loan portfolio by loan type and income level of the household served (shown as a percentage of the area median income).

Homeownership Production

The number of households assisted by City of Portland homeownership programming, by income levels and program tools.

Homeownership

Through programs and investments focused on increasing access to homeownership and retention of owned homes, the City of Portland helps low- and moderate-income households realize the many benefits of owning a home. Since 2010, the City has issued down payment assistance loans for first-time homebuyers and home repair loans to support existing homeowners struggling to manage the costs of maintaining a home. These loans generally require no payments and accrue no interest, in order to maximize financial stability for low-income households.

The City also funds education and counseling programs to create mortgage-ready households, support first-time homebuyers, and prevent foreclosure, as well grants to improve the health and livability of owned homes. These programs are administered through community-serving organizations to reach underserved populations.

The City also directly administers several federal and local programs to promote homeownership and increase the supply of affordable homes. These include the Mortgage Credit Certificate (MCC) program, which increases the buying power of first-time homebuyers by reducing their federal income tax obligation, as well as System Development Charge (SDC) and property tax exemptions to incentivize the development of new affordable ownership homes.

Homelessness

Guide to Homelessness

Program Demographics Homelessness

The City of Portland funds programs designed to prevent and end homelessness for families and individuals. These programs are provided through contracts with various nongovernmental and other public entities, who perform a range of services that address the diverse needs of people experiencing homelessness. Funded services including short-term rent assistance, eviction prevention and housing placement, emergency shelter, and transitional housing.

The local effort to end homelessness is carried out under the umbrella of A Home for Everyone, a collaborative effort by Multnomah County, the City of Portland, the City of Gresham, Home Forward, and other community partners. Beginning in July 2016, an intergovernmental agreement with Multnomah County brought homeless services staff from the City and County together to create the Joint Office of Homeless Services (JOHS), housed within Multnomah County. The Joint Office will receive funding and policy direction from both the City of Portland and Multnomah County. Management of City homeless services contracts is carried out through the JOHS.

Homelessness Services

The number of individuals by race and ethnicity that were assisted through each type of homeless service funded by the City of Portland.

Methodology

Part 1.01 Population, Households, and Income

Population, household, income, homeownership, and racial composition data derived from the 2000 Decennial Census, the 2010 Decennial Census, the 2013 1-year estimates from the American Community Survey, and the 2008-2013 5-year estimates from the American Community Survey—tables B01003, B02008, B02009, B02010, B02011, B02012, B03003, B05012, B11005, B11016, B17020, B19001, B19019, B19019, B19113A, B19113B, B19113C, B19113D, B19113E, B19113I, B19049, B19126, B25119, B25003, B25003A, B25003B, B25003C, B25003D, B25003E, B25003I, B25070, B25118, B25119, DP-1, DP02, DP03, DP05, H014, H016H, HCT012, P011, P015, P021, P053, P087, QT-H13, QT-P5, QT-P10, QT-P20, QT-P21, QT-P24, and S1901.

Part 1.02 Housing Stock and Production

Multifamily and single-family data derived from Multnomah County Tax Lot data. Multifamily and single-family permitting data derived from the Bureau of Planning and Sustainability and Bureau of Development Services permitting data.

Part 2.01 Rental Housing Market Affordability

Household profile data derived from the 2010-2014 American Community Survey – tables S1901, B19019, B19113A, B19113B, B19113C, B19113D, B19113E, B19113I, B19049, and B19126. A 30% share of an equal monthly proportion of the annual median household income data was derived to measure against market rent data. Market rent data derived from the CoStar Multifamily Residential Market data set. Rent data referenced the average 3rd quarter monthly asking rent for 2014 and 2015.

Part 2.02 Homeownership Market Affordability

Household profile data derived from the 2010-2014 American Community Survey—tables S1901, B19019, B19113A, B19113B, B19113C, B19113D, B19113E, B19113I, B19049, and B19126. A 30% share of an equal monthly proportion of the annual median household income data was derived to measure against market home sales data. Median home sales data derived from the Regional Multiple Listing Service data set. Home sales data reference the median home sales price in years 2000 through 2015.

Part 3 Neighborhood Profiles

Neighborhood analysis areas derived from the Bureau of Planning and Sustainability and the Portland Plan 20-Minute Neighborhood areas. Boundary lines have been adjusted to align with the closest census tract/block group/block boundary to minimize margin of error in data analysis.

Part 4.01 Citywide Policy Targets

Citywide policy targets derived from the 1980 Comprehensive Plan Goals and Policies November 2011 version. Housing Bureau staff assessed the planning documents for goals, policies, objectives, etc. that were proximally associated with affordable housing. Housing Bureau staff then determined the affordable housing goals, policies, objectives, etc. for those which had a relatively objective method for assessing progress and those were included as citywide policy targets. Multiple sources of data and information were utilized by staff to determine if the City is currently meeting or not meeting the policy targets.

Part 4.02 Central City Policy Targets

Central City policy targets derived from the Central City 2035 Concept Plan October 2012 version, the Central City Southeast Quadrant Plan July 2015 version, the Central City 2035 West Quadrant Plan March 2015 version, the Central City 2035 N/NE Quadrant Plan October 2012 version, City Council Resolution 36021, and the 1988 Central City Plan. Housing Bureau staff assessed the planning documents for goals, policies, objectives, etc. that were proximally associated with affordable housing. Housing Bureau staff then determined the affordable housing goals, policies, objectives, etc. for those which had a relatively objective method for assessing progress and those were included as citywide policy targets. Multiple sources of data and information were utilized by staff to determine if the City is currently meeting or not meeting the policy targets.

Part 4.03 Urban Renewal Area Policy Targets

Urban Renewal Area policy targets derived from the Central Eastside Urban Renewal Area Housing Strategy 2003 version, the Downtown Housing Inventory and Policy Analysis 2000 version, the Gateway Regional Center Housing Strategy 2003 version, the ICURA Housing Strategy 2002 version, the Lents Town Center Housing Strategy 2000 version, the North Macadam Housing Development Strategy 2003 version, the Lloyd District Housing Strategy 2002 version, and the River District Housing Implementation Strategy June 1999 version. Housing Bureau staff assessed the planning documents for unit production goals, policies, objectives, etc. that were associated with affordable housing and those were included as citywide policy targets. Multiple sources of data and information were utilized by staff to determine if the City is currently meeting or not meeting the policy targets.

Part 5.01 Rental Housing

Regulated affordable rental unit data derived from Portland Housing Bureau asset portfolio data sets. Regulated affordable rental unit counts are added to the production pipeline in various stages based on whether the project is under review, in pre-development, or under construction. Regulated affordable rental units shift from being reported in the production pipeline to being counted in the asset portfolio when construction is in final stages/complete and units become move-in ready.

Part 5.02 Homeownership

Homeownership data derived from Portland Housing Bureau single-family loan portfolio data sets and program outcome data sets.

Part 5.03 Homelessness

Homelessness data derived from Portland Housing Bureau program outcome data sets.

Part 6 Funding

Historical budget data, current budget data, and forecasting data derived from point in time analyses by the finance and accounting staff at the Portland Housing Bureau.
