\* Please note: A total of two private development projects have yet to submit their intake form (which identifies the total number of units required based on the option selected) which accounts for a projected minimum of 14 IH Units not accounted for in the total (coming to a possible total of 435 Non-PHB IH Units and 508 total IH Units). PHB staff cannot confirm totals of units by type for those same two projects. The affordability levels for two of the projects that have yet to submit intake forms is unable to be determined. These calculations do not take into account minimum if using reconfiguration, which would be lower in total but increase the number of family type units.

\*Please note that one of the recently constructed buildings selected Option 3 to fulfill its IH requirements. Per Option 3, a building can elect to send its IH Units to a newly constructed Receiving Building. The Receiving Building must receive Certificate of Occupancy within three years of Sending Building's permit issuance. At this time 11 of 43 Total IH Rental Units on Market are connected to a newly constructed Sending Building. The Receiving Building is currently under construction. Therefore, these eleven units are not currently available to rent.
