Testimony to **Portland City Council** on the **Design Overlay Zone Amendments, Recommended Draft**

I support DOZA, as it would help more people live in high opportunity, desirable neighborhoods. I encourage Council to listen to affordable housing developers who support the clear and objective Design Standards, which will make it easier to add affordable housing to those neighborhoods. Portlanders of all incomes should be able to live in our amenity-rich neighborhoods. I strongly support the Portland: Neighbors Welcome pro-housing amendments and oppose the arbitrary design requirements suggested by affluent neighborhoods - the same neighborhoods that should be encouraging more affordable and more abundant homes according to the City's Anti-Displacement Action Plan. I also oppose any amendments that would allow the Design Commission to add delay and uncertainty to the approval of new buildings with housing or to shrink those buildings below what's allowed in code.
