Testimony to **Portland City Council** on the **Design Overlay Zone Amendments, Recommended Draft**

I support adding the design standards recommended by SMILE to DOZA so that there are better building design options in Sellwood-Moreland and throughout Portland. These additional standards increase choices for developers and directly respond to the DOZA tenets, especially "Build on context" and "Contribute to Public Realm." The standards recommended by SMILE are found in the structures of many cultures, they are not only from western architecture. The recommended standards support diverse, sustainable and equitable development. Thank you.
