

RENEWABLE ENERGY PROJECT FORM – DRAFT

This section helps us understand the details of your renewable energy project and to collect information needed to calculate a score for greenhouse gas impact. Please provide answers to the questions that apply to your project. The narrative boxes expand so please take all the space you need to provide the information requested.

1. Provide a description of the renewable energy technology(ies) that the project will include.

Narrative response

2. Describe energy storage, include capacity, if applicable.

Narrative response

3. Type fuel(s) or energy the project will displace (e.g. electric power, natural gas):

4. Installed capacity: _____

5. Estimated annual kWhs the project will generate in first year of operation: _____

6. Estimated cost/kW (total project cost including any leveraged funds): _____

7. Location(s) of project, provide nearest cross streets, neighborhood, zip code or other descriptor if known: _____

8. Electric utility at project location(s) (if known): _____

9. If the project will be on a building(s), is the building(s), check all that apply

- Single family residential
- Multi-family residential
- Commercial building
- Mixed use
