Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

The current situation on Oak street next to laurlhurst park is very disturbing. My husband has lived in this neighborhood all his life and now he is very disturbed about the filth, garbage, rats, and frequent strange and often disturbed individuals walking about. In the winter, there are frequent open un contained fires, and always poop and pee, needles, and we have witnessed people receiving themselves in the open. This new policy you are recommending will only make things worse. We are opposed to allowing use of open spaces in parks and in front of our homes.
