Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Dear Representative My family and I are concerned about the implications of S2HC. My our neighborhood has been effected by the homeless crisis, be it violence, home intrusions, or as simply as not being able to use the play grounds due to used needles and excrement. As the camps grew in Size around our house we did not feel safe due to people screaming at us and having physical altercations with each other. I understand that there is a problem but by allowing homeless to encroach into the park system it takes them away from the rest of the citizens Thank you for your consideration The Yarbrough family
