Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

It's extremely unfair to the people that pay taxes in this city to destroy their parks when they take their family/children through those parks for enjoyment. Portland is becoming a laughing stock of this country with the willingness to allow homeless to litter the streets we used to enjoy. It's driving people out of what we're once coveted neighborhoods. The Mayor and Governor should settle the issue and give up their homes as campsites. Their incompetence has caused these problems, only seems fair.
