Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Please identify the water, sewer, sanitation, bathroom supplies, hand washing stations, etc. that the City of Portland will be providing. This proposal appears to do nothing to actually move forward the many promises that the City of Portland has been making to its citizens to house the homeless for years now. The law is that if there is a bed available, the city can force someone to stay in it but apparently in a city filled with computer programmers, we have no way of knowing where a bed is available? There appears to be no coordination of services. These proposals do nothing but kick the can down the road again and do a disservice to those of us who pay thousands of dollars in taxes every year to enjoy clean parks.

Testimony is presented without formatting.
