Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

This is such a great idea and will help to attract thousands of homeless people from all over the USA! We really need more homeless people With their clean housing, hygiene and no longer any worries about drug use! My daughter thought it was really cool to see all those needles laying all over She said it's great that all the homeless people are getting their COVID shots! We should also offer this to at least 10,000 illegal aliens too and then we can have real diversity in our homeless population!
