Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Portland has a homeless crisis and while we need long term solutions to this problem-what we DONT need is more problems. Each day we allow homeless to create camps in public spaces and accrue garbage without appropriate restrooms we are creating bigger problems. In the past we enforced anti camping rules and we did not have as big of a problem. It isn't rocket science . I believe we need more little warm huts like those on water avenue AND we need to employ our homeless to clean up the camps. We have lived in portland 30 years and are now looking to leave town because our wonderful city is unclean and unsafe. Sad
