Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

The solution is not to let the homeless over run our city more. The laws you've already made have made this problem worse. Not everyone on the street is disadvantaged. There are many criminals and drug addicts that take advantage of your flimsy laws and no. Punishable crimes. Take a walk. Look around. The amount of stolen bikes you could set up a bike shop. Something different has to be done. Do not take advantage of your law abiding tax paying non drug using citizens. Re think your approach. Re enforce laws that keep people off the streets in the first place. Hold some people accountable. Stop ruing this city w your laws that just make things worse. Kids play in parks, people ph good money to golf. Now your trying to trash these things too?
