Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

The housing crisis is an issue of livability and a humanitarian issue that causes undue suffering for its most vulnerable victims. All Portland must share in the workload of solving this crisis. I am writing to admonish you to seek equitable development and distribution of homeless shelter/facility/sites across all of Portland. While I supported doing our part with Hansen and Blackburn, we have seen the stark impact that has made on the Hazelwood neighborhood and East Portland. It is imperative that the burden of the housing crisis, which is all Portland's crisis, be shared by all of Portland. Respectfully, M. Johnson
