Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

The maps that you show the public for this proposal are truly worthless. Much more salient would be a map of public owned property. And I use "Public Owned" instead of City Owned because we the people own it. Not the departments we allow to use it. The public owns hundreds of sites that would make perfect shelters. Like under all the water towers you are trying to dispose. Or the mulch site behind Dignity Village. Or the snow plow training site on N. Sunderland, or the horse paddock on NW Naito Parkway used to store old wood. And, yes, lets not forget the hundreds of zombie houses that the city has failed to take action on.
