Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

As a real estate professional, I am horrified at what our city is becoming. Now the idea that our beautiful city parks will, in all likelihood, become homeless camps is just another sad chapter in our decline. Those who have purchased condos near city parks will no longer feel safe. Their property will lose significant value. Other cities will be buying bus tickets for their homeless to come to Portland where we are making it a haven for the homeless. Please don't further ruin this city by changing the zoning to allow camping in city parks. Renee Harper
