Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

In the richest country in the world, no one should be forced to sleep in a car or tent. I understand that high rents and the inadequacy of our social safety net are mostly outside the purview of Portland City Council, thus here we are with the Shelter to Housing Continuum Project. I support it, and welcome any shift away from the criminalization of poverty. I especially support the changes allowing for a tiny house or RV on private property.

Testimony is presented without formatting.
