Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Portland was once a beautiful city. Now it is filled with tents, garbage, rats and graffiti everywhere. Allowing bums to take over the parks is just the latest example of a city in decline. We are now a national joke, with non stop protest, broken out windows, boarded up buildings and little police protection. When you allow the bums to take over the parks you are excluding all the tax payers, who pay for the parks, to use them. Who wants to step on a needle or have their children step on a needle when they go park? I moved out of Portland last year. I could no longer take the craziness any longer. It is best thing I ever did!
