Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

This is not the answer to the current problems faced by Portland. We are already at a crisis point in terms of no longer being a city high on the livability scale. People are leaving, businesses are closing, and garbage abounds. Allowing camping in our parks is not a creative solution to a very significant problem and not in the interest of the common good. This is not right for everyone.
