Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

There is one provision that I do not support, the provision that classifies Open Space Zone, that allows camping in our city parks. We have lost our streets to our citizens that are without a home, and we should do something to address that but allowing camping in our city parks is not the right direction. Please go to Lauralhurst Park, the citizens without homes are camping all along the parking verge space around the entire park. I am opposed to this provision.
