Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

It is not okay for open space zones to be used for camping and the homeless. This is ruining our city and making our city a dump. If you want them to come live in your home that is fine but I don't want them in our parks and open spaces. Our city is becoming a dumping ground drive around and see what this is doing. The citizens that you represent do not want this and it is not okay. The clean up alone that it would cost the city and the crime associated with these areas are going up all the time. This is NOT okay do not pass this change.
