Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Hello, I would like to submit testimony as a citizen of Portland. The proposals for the Shelter to Housing Continuum are important for responding to the housing issue, an urgent crisis is likely to get worse as the eviction moratorium expires. Easing the siting of multiple kinds of housing is a better way to address the needs of our city's most vulnerable neighbors while we work towards important long term goals like increasing the number of apartments in the city and increasing affordable options. This is an essential minimum step for Portland to be a city for everyone, not just the most wealthy.

Testimony is presented without formatting.
