Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

The homeless problem need a much better solution than allowing them a safe haven in places that family's and children frequent. As a life long East Side resident, the burden of this problem has been disproportionately affecting us, and allowed to continue in an unmonitored and unchecked manner. This is an unacceptable. If this problem continues to not have a viable solution, one that doesn't continue to impact public spaces, you will see a much bigger migration to the West Side where the problem isn't as glaring, myself included.
