Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

OF all the incredibly STUPID ideas the city of Portland has made us tolerate this has to be the absolute WORST. EVER. Why not make more drugs legal and free, alcohol and cigarettes too! Portland has become a joke not just on the national stage, but internationally as well. THE CITY THAT DOESN'T WORK, where the young go to retire, and the worst city government in the country. Like many of our neighbors we are looking at moving, good luck replacing the \$22,000 a year we pay in property taxes and the other thousands we spend on local retail and dining. The Pearl already is 35% subsidized housing for those who don't understand how to use birth control. Wait until this idea gets across the country, there will be a wave of homeless people moving to PDX. THIS IDEA IS ABSOLUTELY RIDICULOUS! Try and focus less on being WOKE and keeping the city from going BROKE.
