Testimony to Portland City Council on the Shelter to Housing Continuum Project, Recommended Draft

The wording of this proposal states that temporary homeless housing will be placed throughout the city. Looking at a map, that statement is incorrect. All proposed sites are concentrated on the east side. Leaving out about 3/4 of the rest of the city without any sites. I live on the west side so am not directly affected by this proposal, but find it disingenuous and misleading. We should all share the burden of solving the homeless problem. It is unfair to put such a large burden on such a small part of the city.

Testimony is presented without formatting.
