Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

I have watched this situation grow from bad to worse without any efforts to control the trash, unsanitary conditions off Foster in the Johnson Creek watershed.... this areas breeds crime and filth that is just ignored an allowed to multiply and just exist without any efforts to remove or clean up/mitigate... years of destruction to a preserve and park that the taxpaying citizens deserve to have cleaned up and not just left to degrade the land and community. Multiple vehicles are burned out, nature destroyed, city property damaged, disease and excrement just slowed to impose a health risk to the entire community— especially coming off a pandemic! Please start a fund or something or deploy temporary funds to address this growing problem — we are begging for help! It's is not safe to even traverse the sidewalks or go down the nearby walking trails — I support and testify what was capture on drone footage off Foster Rd is accurate — anyone driving by can see it plainly

Testimony is presented without formatting.
