Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

The state of our beautiful city is in crisis and is an absolute travesty. As a single woman, I fear for my safety in the Pearl District, where I have owned my home for six years. Our tax dollars pay for enjoyment of our parks, not to be destroyed by the homeless with debris, trash, and drugs. Portland has become a threat to public health and safety, and the tax payers should get some respite by not allowing this project to move forward.

Testimony is presented without formatting.
