Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Designating Open Spaces & city parks as camping areas will effectively ruin the urban sanctuary of Portland parks. It will make them unsafe and unclean for us by families who pay for these parks. The world has changed with COVID and having outdoor spaces for children is more important than ever before for their mental & physical health. We need a solution to Portland's house less problem but this is NOT IT.
