Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Portland is a progressive city. Let's act like one and provide actual housing for the people who need it. For decades Portland has been an innovative city with great ideas. This proposal to change zoning is a bad idea. Providing space for people to pitch a tent is the easy way out and ultimately will only hurt the city and region. Please do not make this change. Please, let's put our money where our hearts are and build housing for those that need it! Let's act like Portlanders!
