Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

This is great. We've got to get people from living on the streets or sleeping in bushes. The only solution to homelessness is to house people. I live East of the 205, even if there's more shelters out here, fine, better to have shelters than people sleeping on sidewalks and pooping in bushes. It's safer and healthier for them and us. I hope the council understand that we must house everyone as quickly as possible.
