Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

This proposal is not a solution, the homeless will absolutely destroy our parks that we pay to enjoy. We already can't walk down our streets without stepping over feces, needles, and garbage strewn around tents blocking the way. Where will the city get their money when all of the hardworking tax payers are forced to leave because this issue has gotten so out of control?

Testimony is presented without formatting.
