Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

as a WOMAN who walks in a park almost every day, i would not feel comfortable for my SAFETY if we allow people to put up tents for 6 months at a time. this is too long for people to pitch tents, it allows the tented area to become a breeding ground of drugs and illegal activities. we just had a woman die walking home at night, is this the right move for the community? there has got to be a better space for the homeless...not a place where our kids run free and is a safe space for people to get out of their home and enjoy nature.
