Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

No more camping on areas that aren't meant for camping. Don't take our parks. We work hard to pay housing/taxes in this city. If priority is given people who live in tents to live, dump trash and otherwise trash our parks and open space then where will the rest of us recreate? The city needs to purchase private land and create campgrounds. Not take the land that is made for recreation. Keep Portland livable.
