Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

No! This is not a sustained solution. Once the camps are established there is no going back. Find a permanent solution and stop creating more "fixes" that result in Portland truly becoming Dumptown. We the tax payers just voted in a \$50m measure to improve parks. How does that square with this proposal. Go back to the drawing board! Look to developers, city and Metro planners, utilize buildings that are currently not in use. Do not ruin outdoor gathering spaces for the entire community, so a small percentage can overtake them on the tax payers dime.
