Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Please help our city! I've lived in the Portland area my entire life and the past few years I have seen a devastating decline in the livability of our once beautiful city. Businesses no longer want to be here and people no longer want to live here! I feel for the homeless and I want to find a solution to help them, but turning our city into a homeless camp is not the answer. Please do not make the situation worse. We need mental health help and drug rehabilitation facilities, not open spaces in neighborhoods that put our families at risk.
