Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

This idea is appalling. The whole last year in this city has been appalling. it honestly feels like the "leadership" in this city has no consideration for the well-being and safety of tax-paying citizens, families and small-businesses. Instead you all constantly cater to the opposite. i've lived here for 17 years and i feel unsafe having my children anywhere near downtown or out after dark in most neighborhoods. i'm absolutely appalled with how you all have allowed this city to be just RUINED. great work (major sarcasm in case you all have a portland public school education and didn't get that). i hope you all get replace and NOT by ionerone. have some guts to stand up for the people who actually pay for this city along with your inflated salaries. i'm so appalled.
