Testimony to **Portland City Council** on the **Shelter to Housing Continuum Project, Recommended Draft**

Allowing camps in city parks is up there with the worst city planning decisions in history. When mentally ill drug addicts are mingling with our children on the play ground, I will be sure to invite the city council's children over for a play date. No common sense, a recipe for disaster, and compounding the problem. City parks need to be safe and clean for our children. Truly dumbfounded that this has been proposed and being considered.
